

MOH-40

IDC Connector Module

IDC connector modules are used in industrial control as a connecting interface between electronic and conventional components. They serve as the signal conversion from ribbon cable connector and screw type terminals. The IDC connector modules provide user a convenient, quickly installed, and easily replaced input/output platform for all common PLC's.

The standard models have the header from 10 to 64 with ejectors and strain/relief features to fit different application. Customer specified design will be accepted for particular requirement. The modules can be mounted on standard rails TS15, TS32, and TS35.

Specification

Unit: mm

Pole	Dimension (L x W x H)
10P	46 x 85 x 53
14P	56 x 85 x 53
16P	61 x 85 x 53
20P	71 x 85 x 53
26P	86 x 85 x 53
30P	96 x 85 x 53
34P	106 x 85 x 53
40P	121 x 85 x 53
50P	146 x 85 x 53
60P	171 x 85 x 53
64P	181 x 85 x 53
