SuperFlux LEDs

Technical Datasheet DS55

SuperFlux LEDs

Lead-Free

Introduction

The revolutionary package design allows lighting designers to reduce the number of LEDs required and provide a more uniform and unique illuminated appearance than with other LED products. This is possible through the efficient optical package design and high-current capabilities.

The low profile package can be easily coupled with reflectors or lenses to efficiently distribute light and provide the desired appearance. This product family includes red, red-orange and amber LEDs, allowing lighting designers to match the color of many lighting applications like vehicle signal lamps, specialty lighting, and electronic signs.

SuperFlux LEDs Feature

- Rugged package
- Energy saving
- Ease of handling
- Lead-Free
- RoHS Compliant
- High Luminance
- Uniform Color
- Low Power Consumption

Company Information

Philips Lumileds is a leading provider of LEDs for everyday lighting applications. The company's records for light output, efficacy and thermal management are direct results of the ongoing commitment to advancing solid-state lighting technology and enabling lighting solutions that are more environmentally friendly, help reduce CO₂ emissions and reduce the need for power plant expansion. Philips Lumileds LUXEON® LEDs are enabling never before possible applications in outdoor lighting, shop lighting, home lighting, consumer electronics, and automotive lighting.

Philips Lumileds is a fully integrated supplier, producing core LED material in all three base colors, (Red, Green, Blue) and white. Philips Lumileds has R&D centers in San Jose, California and in the Netherlands, and production capabilities in San Jose, Singapore and Penang, Malaysia. Founded in 1999, Philips Lumileds is the high flux LED technology leader and is dedicated to bridging the gap between solid-state technology and the lighting world. More information about the company's LUXEON LED products and solid-state lighting technologies can be found at www.philipslumileds.com.
