### Functional Product Groups for Reference

High Temperature Masking Series.....	PTC, PTP, PSC, SRC, SFC, SRP, SPP, MTG, MTB, MTK, MTS, MDG, MDK and most vinyl series available in HiTemp vinyl
Static Protection Series .....	SEC, SEP, DCC, DP, EMC, CEC, CEP, CEG, RJ
Finishing Part Series .....	BR, BPF, FP, FCR, RH, SH
Furniture Glides Series.....	COF, SQR, RER, CCF
Flat Faced O-Ring Series .....	AFO, FCO, PDF

## CAPS

Our caps fit over threads, fittings and more; tapered caps protect tubing and threaded or machined parts; threaded caps protect flared or flareless fittings, O-ring ports, pipe fittings and tube ends; non-threaded caps protect hydraulic fittings.

## PLUGS

Our plugs protect the insides of fittings, female threads and more; tapered plugs protect tubing and threaded or machined parts; threaded plugs protect flared or flareless fittings, O-ring ports, pipe fittings and tube ends; non-threaded plugs protect hydraulic fittings and threaded connectors.

## WRAPS

Protective tape is designed to mask during painting, plating, powder coating, anodizing and other finishing applications. These silicone and polyester materials can handle intermittent temperatures as high as 600°F (316°C).

## EDGE LINERS

Edge liners offer protection from sharp edges and openings in sheet metal. Grommets are available to protect electrical insulation, hoses and cables installed through holes punched in metal.

## NETTING

Sleeve-Web® plastic netting comes in tubes to protect smooth, threaded or cylindrical parts, and in sheets for flat, irregular or nesting parts. A special series is also available for compressed air cylinders and bottles.

## CUSTOM

More than 2,000 custom molds of items not listed in our catalog are available in stock for use as is or for modification. Engineering, technical support and prototype services are also available for custom designs.

See Caplugs Selector Guide on pages 2-7

# CAPPLUGS SELECTOR GUIDE

## Caps

Caplugs offers a complete line of caps designed to protect virtually any product for virtually any application. These caps are manufactured from a variety of materials including low and high density polyethylene, silicone rubber, paper and vinyl.

### Threaded

Plastic and metal screw-on caps provide protection for externally threaded parts, flared and flareless fittings, and tube ends.

**ASC SERIES**  
Aluminum caps seal flared fittings  
Pages 76-77

**CD SERIES**  
Plastic caps for tubing and flared fittings  
Pages 76-77

**PC SERIES**  
Caps for pipe end protection  
Pages 78-79

### Non-Threaded (Tapered or Straight)

These caps are ideal for capping threaded and non-threaded parts as well as for providing masking protection. They're easy to slip on and off, while maintaining secure product protection.

#### Tapered

Tapered caps are used to protect a wide variety of tubing and threaded or machined parts and ports from dust, moisture and impact damage. These caps also act as masking protection for painting, plating, powder coating, and anodizing operations.

**GC SERIES**  
Color coded grease fitting caps with tether  
Pages 34-35

**J SERIES**  
Tear-tab caps for NPT pipe threads  
Pages 32-33

**MJ SERIES**  
Tear-tab caps for NPT pipe threads  
Pages 32-33

**PTC SERIES**  
Tapered paper caps  
Pages 34-35

**T SERIES**  
Tapered body gives snug fit as cap  
Pages 18-21

**W SERIES**  
Wide flange protects adjacent machined surfaces  
Pages 24-25

**WW SERIES**  
Wide, thick flange prevents "force-through"  
Pages 22-23

**WWX SERIES**  
Extra-wide, thick flange for extended visibility  
Pages 24-25

#### Straight

Straight caps are designed to provide snug fitting product protection and easy application and removal.

**CBC SERIES**  
Coaxial cable connector caps  
Pages 34-35

**CEC SERIES (conductive)**  
Conductive caps for dissipating electrostatic charge and providing electrical shield over ends of threaded and non-threaded connectors  
Pages 38-39

**DCC SERIES**  
For static dissipative and conductive protection of D-subminiature rectangular connectors  
Pages 40-41

### Straight (cont.)

**DP SERIES**  
Conductive plugs to dissipate electrostatic charges and provide mechanical protection and electrical shielding of ITT Cannon-style connectors  
Pages 40-41

**EC SERIES**  
Caps for threaded or smooth connectors  
Pages 26-27

**EMC SERIES**  
For static dissipative protection of SCSI and champ-type connectors  
Pages 40-41

**FC SERIES**  
Cap with cap, for flareless tube and nut assemblies  
Pages 30-31

**FCO SERIES**  
Flat-faced O-Ring caps  
Pages 26-27

**FF SERIES**  
Square, hexagonal and triangular caps for flanged fittings  
Pages 42-43

**HC SERIES**  
Hose caps for tube and hose ends  
Pages 26-27

**HSF SERIES**  
Caps for high pressure, split-flange hydraulic connections  
Pages 42-43

**JS SERIES**  
Tear-tab caps for straight threads  
Pages 32-33

**MJS SERIES**  
Tear-tab caps for metric threads  
Pages 32-33

**PSC SERIES**  
Straight-sided paper caps  
Pages 34-35

**RC SERIES**  
Shouldered, multiple use caps for externally threaded parts  
Pages 30-31

**RCL SERIES**  
Shouldered, extra-long bodied caps for multiple uses  
Pages 30-31

**SC SERIES**  
Straight-sided caps fit outside diameters with snug grip  
Pages 28-29

**SEC SERIES**  
Static dissipative caps provide electrostatic discharge protection on threaded or smooth connectors  
Pages 38-39

**SF SERIES**  
Caps for split-flange hydraulic connections  
Pages 42-43

**SFC SERIES**  
Silicone flange caps  
Pages 36-37

**SRC SERIES**  
Silicone rubber caps  
Pages 36-37

### Polaris Vinyl

These soft, flexible caps are molded from a specially formulated vinyl to provide a snug, clinging fit for maximum protection.

**AN SERIES**  
Designed to cap AN-style fittings  
Pages 74-75

**EZ SERIES**  
Flexible vinyl, EZ-Pull caps  
Pages 50-51

**MS SERIES**  
Designed to cap MS-style fittings  
Pages 74-75

**VMF SERIES**  
Vinyl caps for "U" shaped metal frames  
Pages 72-73

**VNG SERIES**  
Round finger grip  
Pages 68-69

**VOR SERIES**  
Vinyl O-rings to protect tube ends  
Pages 66-67

**VAC SERIES**  
Vinyl caps for "L" shaped frames  
Pages 72-73

**VAS SERIES**  
Flange covers for American Standard Assoc., Navy & Military flange faces  
Pages 58-59

**VC SERIES**  
Round, soft, flexible vinyl caps  
Pages 46-49

**VRF SERIES**  
Vinyl caps & grips for rectangular applications (flat top)  
Pages 64-65

**VRR SERIES**  
Vinyl caps & grips for rectangular applications (rounded top)  
Pages 66-67

**VSC SERIES**  
Vinyl caps & grips for square applications  
Pages 62-63

**VCF SERIES**  
Round vinyl caps with a flange for easy removal  
Pages 56-57

**VF SERIES**  
Flange cover for most joints & flared tubing  
Pages 58-59

**VFC SERIES**  
Flexible vinyl caps with flat pull-tab  
Pages 52-53

**VSE SERIES**  
Anti-roll end caps  
Pages 62-63

**VSR SERIES**  
Flange covers that snap securely in place  
Pages 60-61

**VVC Vent-a-Cap SERIES**  
Soft flexible vented caps  
Pages 54-55

**VFE SERIES**  
Vinyl caps with flat ergonomic pull-tab  
Pages 50-51

**VHC SERIES**  
Round caps with center hanger tab  
Pages 70-71

**VHF SERIES**  
Rectangular caps with hanger tab  
Pages 70-71

### Finishing Parts

Finishing caps are designed for round tubing to improve appearance and protect against nicks and chips.

**COF SERIES**  
Round caps fit over ends of tubing and rods  
Pages 44-45

**FCR SERIES**  
Heavy wall cap for round tubing  
Pages 44-45

**RH SERIES (RHW SERIES)**  
Finishing and protection for raised-head screws  
Pages 44-45

**VHG SERIES**  
Round finger grip with hanger tab  
Pages 68-69

**VHR SERIES**  
Round caps with side hanger tip  
Pages 70-71

**VIF SERIES**  
Vinyl caps for "I" shaped metal frames  
Pages 72-73

# CAPPLUGS SELECTOR GUIDE

## Plugs

Caplugs offers a complete line of plugs designed to protect virtually any product for virtually any application. These plugs can be manufactured from low and high density polyethylene, silicone rubber, paper or vinyl.

### Threaded

Plastic and metal screw-in plugs provide protection for internally threaded parts, flared and flareless fittings, SAE O-ring ports, NPT pipe fittings, and tube ends. Threaded plugs are available in straight, NPT, metric and BSP (British Standard Pipe) threads.

**ADP SERIES**  
Aluminum threaded plugs seal flareless tube ends  
Pages 112-113

**AFO SERIES**  
Aluminum threaded plugs for flat-faced O-ring fittings  
Pages 112-113

**ASP SERIES**  
Aluminum plugs for flared fittings, straight ports  
Pages 112-113

**BSP SERIES**  
British Standard Pipe threaded plastic plugs  
Pages 112-113

**MSP SERIES**  
Metric threaded plugs with slotted head  
Pages 110-111

**P SERIES**  
NPT threaded plugs for pipe fittings  
Pages 106-107

**PD SERIES**  
Plastic plugs for flared fittings, straight ports  
Pages 110-111

**PDE SERIES**  
Threaded plugs for threaded ports  
Pages 108-109

**PDF SERIES**  
Plastic plugs for flat-faced O-ring fittings  
Pages 110-111

**PDI SERIES**  
Threaded plugs for boss type & inverted flare fittings  
Pages 108-109

**PDO SERIES**  
Threaded plugs for SAE O-ring ports  
Pages 108-109

**RP SERIES**  
Machine-threaded plastic plugs  
Pages 114-115

**RPO SERIES**  
Dual sealing plugs for flat-faced hydraulic fittings  
Pages 114-115

**RPO-M SERIES**  
Metric-threaded plugs for hydraulic fittings  
Pages 114-115

**UTP SERIES**  
Universal thread plugs  
Pages 114-115

### Non-threaded (Tapered or Straight)

These plugs are ideal for plugging threaded and non-threaded parts as well as for providing masking protection for painting, plating, or grid-blasting operations.

#### Tapered

Tapered plugs are used to protect a wide variety of tubing and threaded or machined parts and ports from dust, moisture and impact damage. These plugs also act as masking protection for painting, plating, powder coating, and anodizing operations.

**CPT SERIES**  
Convenient center-pull tab for easy insertion and removal  
Pages 90-91

**K SERIES**  
Flush fitting plug for round tubing  
Pages 92-93

**L SERIES**  
Features lift-tab for easy removal  
Pages 90-91

**PTP SERIES**  
Tapered paper plugs  
Pages 88-89

**SFP SERIES**  
Covers for split-flange hydraulic connections  
Pages 92-93

**SRP SERIES**  
Tapered silicone rubber plugs  
Pages 94-95

**STP SERIES**  
Provides maximum inside space for packaging tubes  
Pages 92-93

**T SERIES**  
Tapered body gives snug fit as plug  
Pages 80-83

**W SERIES**  
Wide flange protects adjacent machined surfaces  
Pages 86-87

**WW SERIES**  
Wide, thick flange prevents "force-through"  
Pages 84-85

**WWX SERIES**  
Extra-wide, thick flange for extended visibility  
Pages 86-87

#### Polaris Vinyl

These soft, flexible plugs are molded from a specially formulated vinyl to provide a snug, clinging fit for maximum protection.

**TP SERIES**  
Tapered and soft vinyl plugs  
Pages 104-105

**VTP SERIES**  
Flexible vinyl, tapered plugs  
Pages 104-105

### Non-threaded (Tapered or Straight)

#### Straight

Straight plugs are designed to provide snug fitting product protection and easy application and removal.

**CEP SERIES**  
Conductive plugs for dissipating electrostatic charges and providing electrical shield over ends of threaded and non-threaded connectors  
*Pages 96-97*

**DP SERIES**  
Conductive plugs to dissipate electrostatic charges and provide mechanical protection and electrical shielding of ITT Cannon-style connectors  
*Pages 96-97*

**EP SERIES**  
Plugs for threaded or smooth connectors  
*Pages 88-89*

**BP SERIES**  
Recessed button plugs close sheet metal holes  
*Pages 98-99*

**BPF SERIES**  
Flush button plugs close sheet metal holes  
*Pages 98-99*

**CCF SERIES**  
Round load-bearing plugs fit ends of tubing on wide range of metal furniture  
*Pages 102-103*

**RJ SERIES**  
Conductive plugs for protecting RJ telephone type connecting jacks on computers  
*Pages 88-89*

**SEP SERIES**  
Static dissipative plugs provide electrostatic discharge protection on threaded or smooth connectors  
*Pages 96-97*

**SPP SERIES**  
Silicone rubber pull-plugs  
*Pages 94-95*

**FP SERIES**  
Flush fitting plugs for square tubing  
*Pages 100-101*

**PIP SERIES**  
Push-in plugs fit SAE thread sizes  
*Pages 100-101*

**PIP TAB SERIES**  
Push-in plugs with convenient pull-tab  
*Pages 100-101*

**RER SERIES**  
Rectangular load-bearing plugs fit special tubing shapes on many metal furnishings  
*Pages 102-103*

**SH SERIES**  
Protects socket head screws and counterbores  
*Pages 94-95*

**SQR SERIES**  
Square load-bearing plugs fit snugly into square tubing  
*Pages 102-103*

# CAPPLUGS SELECTOR GUIDE

## Polaris Vinyl

With the recent acquisition of Polaris Plastics, Caplugs now offers the largest line of standard and custom vinyl products in the industry. These soft and flexible protective products are molded from a specially formulated, dip-molded vinyl to provide a tight, secure fit. Our full line of vinyl products includes caps, plugs, grips, hanger tips and flange covers. Most of these products are available in nine standard colors, with lengths up to 8", diameters up to 21" and a full range of sizes. Most vinyl products are also available in special formulations for high-temperature applications. Extensive custom designs and capabilities are also available. See pages 8-9 for details.

**AN SERIES**  
Designed to cap AN style fittings  
Pages 74-75

**DR SERIES**  
Reusable wrap-around protectors for preventing dents, scratches on tubing  
Pages 122-123

**EZ SERIES**  
Flexible vinyl, EZ-Pull caps  
Pages 50-51

**VHR SERIES**  
Round caps with side hanger tip  
Pages 70-71

**VIF SERIES**  
Vinyl caps for "I" shaped metal frames  
Pages 72-73

**VMF SERIES**  
Vinyl caps for "U" shaped metal frames  
Pages 72-73

**MS SERIES**  
Designed to cap MS style fittings  
Pages 74-75

**TP SERIES**  
Tapered and soft vinyl plugs  
Pages 104-105

**VAC SERIES**  
Vinyl caps for "L" shaped frames  
Pages 72-73

**VNG SERIES**  
Round finger grips  
Pages 68-69

**VOR SERIES**  
Vinyl o-rings to protect tube ends  
Pages 66-67

**VRF SERIES**  
Vinyl caps & grips for rectangular applications (flat top)  
Pages 64-65

**VAS SERIES**  
Flange covers for American Standard Assoc., Navy & Military flange faces  
Pages 58-59

**VC SERIES**  
Round, soft, flexible vinyl caps  
Pages 46-49

**VCF SERIES**  
Round soft flexible vinyl cap with a flange  
Pages 56-57

**VRR SERIES**  
Vinyl caps & grips for rectangular applications (rounded top)  
Pages 66-67

**VSC SERIES**  
Vinyl caps & grips for square applications  
Pages 62-63

**VSE SERIES**  
Anti-roll end caps  
Pages 62-63

**VF SERIES**  
Flange cover for most joints & flared tubing  
Pages 58-59

**VFC SERIES**  
Flexible vinyl caps with flat pull-tab  
Pages 52-53

**VFE SERIES**  
Vinyl caps with flat ergonomic pull-tab  
Pages 50-51

**VSR SERIES**  
Flange covers that snap securely in place  
Pages 60-61

**VTP SERIES**  
Flexible vinyl tapered plugs  
Pages 104-105

**VVC Vent-a-Cap™ SERIES**  
Soft, flexible vented caps  
Pages 54-55

**VHC SERIES**  
Round caps with center hanger tab  
Pages 70-71

**VHF SERIES**  
Rectangular caps with hanger tab  
Pages 70-71

**VHG SERIES**  
Round finger grips with hanger tab  
Pages 68-69

# EDGE LINERS

## Wraps

Our protective tape is designed to mask parts during painting, plating, powder coating, anodizing and other finishing applications. These silicone and polyester materials can handle intermittent temperatures as high as 600°F (316°C).

**MTB SERIES**  
Blue polyester  
masking tape for  
powder coating  
Pages 120-121

**MTG SERIES**  
Green polyester  
masking tape for  
powder coating  
Pages 120-121

**MTK SERIES**  
Kapton® film  
tape for powder  
coating  
Pages 120-121

**MTS SERIES**  
Silicone rubber  
masking tape for  
powder coating  
Pages 122-123

**MDG SERIES**  
Green polyester  
masking discs  
Pages 120-121

**MDK SERIES**  
Kapton® gold  
masking discs  
Pages 120-121

**DR SERIES**  
Reusable wrap-around protectors  
for preventing dents, scratches on tubing  
Pages 122-123

Kapton is a registered trademark of E.I. DuPont de Nemours Inc.

## Netting

This tough, stretchable Sleeve-Web® plastic netting comes in tube styles to protect smooth, threaded or cylindrical parts, and in netting sheets for flat, irregular or nesting parts. Special netting is also available for compressed air cylinders and bottles.

**SW SERIES/  
Standard-Duty**  
Tubular protective  
Sleeve-Web  
Pages 124-125

**SW SERIES/Light-Duty**  
Protective Sleeve-Web  
with maximum stretch,  
designed for light-duty  
applications  
Pages 124-125

**SW SERIES/  
Heavy-Duty**  
Durable Sleeve-  
Web for maximum  
impact cushioning  
Pages 124-125

**CSW SERIES/Special**  
A Sleeve-Web for protecting  
the finish and labels on  
compressed gas cylinders  
Pages 126-127

**CBW SERIES/Special**  
A Sleeve-Web for impact  
protection for bottles of  
any size and shape  
Pages 126-127

**PM SERIES/Net Sheetting**  
For use as separators for stacked parts,  
or as wraps for large, odd-shaped parts  
Pages 126-127

## Edge Liners

Our edge liners offer superior protection from bumps and nicks, and cover sharp edges and openings in sheet metal. Grommets are available to protect electrical insulation, hoses and cables installed through holes punched in metal.

**CEG SERIES**  
Conductive edge liners  
provide ESD and physical  
protection of edge board  
connectors and single  
in-line devices  
Pages 116-117

**EGL-11 SERIES**  
For grommeting  
irregularly shaped  
holes in sheet metal  
Pages 116-117

**EGL-12 SERIES**  
For lining holes and  
outside edges of  
sheet metal  
Pages 116-117

**EGL-22 SERIES**  
For protecting edges  
of sheet materials  
Pages 116-117

**GRO SERIES**  
Grommets provide electrical  
insulation; UL listed  
Pages 118-119

**TES SERIES**  
One-piece, one-time, positive-locking seal features  
tamper-evident security and an identification tab  
Pages 118-119

### Polaris Vinyl

These soft, flexible caps are molded from a specially formulated vinyl to provide a snug, clinging fit for maximum protection.

**AN SERIES**  
Designed to cap AN-style fittings  
Pages 74-75

**EZ SERIES**  
Flexible vinyl, EZ-Pull caps  
Pages 50-51

**MS SERIES**  
Designed to cap MS-style fittings  
Pages 74-75

**VMF SERIES**  
Vinyl caps for "U" shaped metal frames  
Pages 72-73

**VNG SERIES**  
Round finger grip  
Pages 68-69

**VOR SERIES**  
Vinyl O-rings to protect tube ends  
Pages 66-67

**VAC SERIES**  
Vinyl caps for "L" shaped frames  
Pages 72-73

**VAS SERIES**  
Flange covers for American Standard Assoc., Navy & Military flange faces  
Pages 58-59

**VC SERIES**  
Round, soft, flexible vinyl caps  
Pages 46-49

**VRF SERIES**  
Vinyl caps & grips for rectangular applications (flat top)  
Pages 64-65

**VRR SERIES**  
Vinyl caps & grips for rectangular applications (rounded top)  
Pages 66-67

**VSC SERIES**  
Vinyl caps & grips for square applications  
Pages 62-63

**VCF SERIES**  
Round vinyl caps with a flange for easy removal  
Pages 56-57

**VF SERIES**  
Flange cover for most joints & flared tubing  
Pages 58-59

**VFC SERIES**  
Flexible vinyl caps with flat pull-tab  
Pages 52-53

**VSE SERIES**  
Anti-roll end caps  
Pages 62-63

**VSR SERIES**  
Flange covers that snap securely in place  
Pages 60-61

**VVC Vent-a-Cap SERIES**  
Soft flexible vented caps  
Pages 54-55

**VFE SERIES**  
Vinyl caps with flat ergonomic pull-tab  
Pages 50-51

**VHC SERIES**  
Round caps with center hanger tab  
Pages 70-71

**VHF SERIES**  
Rectangular caps with hanger tab  
Pages 70-71

### Finishing Parts

Finishing caps are designed for round tubing to improve appearance and protect against nicks and chips.

**COF SERIES**  
Round caps fit over ends of tubing and rods  
Pages 44-45

**FCR SERIES**  
Heavy wall cap for round tubing  
Pages 44-45

**RH SERIES (RHW SERIES)**  
Finishing and protection for raised-head screws  
Pages 44-45

**VHG SERIES**  
Round finger grip with hanger tab  
Pages 68-69

**VHR SERIES**  
Round caps with side hanger tip  
Pages 70-71

**VIF SERIES**  
Vinyl caps for "I" shaped metal frames  
Pages 72-73

# CUSTOM CAPABILITIES

## Custom Products

### Injection-Molded Plastic

Caplugs can accommodate any need for a special design, shape or color. We have tooling readily available to produce over 2,000 special shapes that are not shown in our catalog. Any of these 2,000 custom molds are available for use as is or for modification. What's more, our experts can design a protective part specifically for your application.

### Dip-Molded Vinyl

In addition to our extensive injection-molded capabilities, our recent acquisition of Polaris Plastics has significantly expanded our custom dip molding capabilities far beyond any others in the marketplace. Like injection-molded products, Caplugs can accommodate most needs for special design, shape and color of dip-molded products. Whatever your needs, Caplugs either has the tooling already available or can design the best product solution.

Injection-Molded Plastic

### Custom Capabilities

	Injection-Molded Plastic	Dip-Molded Vinyl
Prototype Design & Samples	1 week	1 week
Production Tooling	4 to 6 weeks	2 weeks
Max. Diameter	9.5 inches (241.3 mm)	27 inches (686 mm)
Min. Diameter	.09 inches (2.29 mm)	.054 inches (1.372 mm)
Max. Length	5 inches (127 mm)	21 inches (533 mm)
Min. Length	.15 inches (3.81 mm)	.187 inches (4.750 mm)
Max. Wall Thickness	.09 inches (2.29 mm)	.125 inches (3.175 mm)
Min. Wall Thickness	.03 inches (0.76 mm)	.030 inches (0.762 mm)
Shapes	Round, tapered, threaded, rectangular, square, various odd shapes	round, oval, flanged, boots, rectangle, square, various odd shapes, multi-dip, bellows
Materials	low, medium and high density polyethylene, polypropylene, thermoplastic rubber, ethylene vinyl acetate, conductive and static dissipative polyethylene	vinyl, foam, matte, translucents, neons phosphorescent, rigid, soft, elastic, high temperature, medical grade, static dissipative, non-copper staining and high durometer
Tolerances	typically +/- .010 inch per inch	+/- .010 wall thickness +/- .010 minimum +/- .060 dip line
Standard Colors	red, black, yellow, translucent, white, green, brown, orange, blue and grey	white, black, brown, orange, red, green, grey, blue and yellow
Secondary Operations	punching, slicing, drilling, printing, assembly, special packaging, cutting, not stamping	punching, slitting, slicing, printing
Lot Traceability	Yes	Yes
Material Certification	Yes	Yes
Compliance to CGMP	Yes	Yes

Dip-Molded Vinyl

Extruded Sleeve-Web Netting

### Extruded Sleeve-Web® Netting

Caplugs' unique, single-piece extruding process for Sleeve-Web permits extensive product variations in terms of web thickness and weight, strand spacing, sleeve diameter, stretchability, material and color. In addition, netting can be modified and/or further fabricated after extruding by cutting, slitting or sealing one end of the netting to create a bag.

### Secondary Operations

We have a variety of options for modifying existing injection-molded plastic or dip-molded vinyl products to meet your needs. If you need us to punch holes in your product, cut slits in it, pad print on it, attach chains or tags to it, make some other modification, or even specially package it, we have that capability.

Our Secondary Operations Department has hundreds of possibilities to offer when developing your customized solutions.

Secondary Operations

## DIMENSIONAL TOLERANCES

Caplugs are designed in accord with functional dimensions and will perform to dimensions listed in this catalog. In view of the flexibility and stretch of most of the materials used in Caplugs, it is recommended that the following tolerances be used for checking purposes, especially by those unfamiliar with measuring this material.

### Tolerances for Inch dimensions given to three decimal places.

±.010" per each inch of length. Minimum is ±.010" where dimension is less than one inch.

#### Examples:

Tolerance for .750" dimension is ±.010"

**Reason:** Although .750"x ±.010" = ±.0075",

±.010" is the minimum.

Tolerance for 1.000" is ±.010".

**Reason:** 1.000"x ±.010" = ±.010".

Tolerance for 1.500" dimension is ±.015".

**Reason:** 1.500" x ±.010" = ±.015".

### Tolerances for Inch dimensions given to two decimal places.

±.020" per each inch of length. Minimum is ±.020" where dimension is less than one inch.

#### Examples:

Tolerance for .750" dimension is ±.020".

**Reason:** Although .750" x ±.020" = ±.015",

±.020" is the minimum.

Tolerance for 1.00" dimension is ±.020".

**Reason:** 1.00"x ±.020" = ±.020".

Tolerance for 1.50" is ±.030".

**Reason:** 1.50"x ±.020" = ±.030".

### Tolerances for Metric dimensions given to two decimal places.

±.25mm per each 25.4mm of length (.01 mm per mm). Minimum is ±.25mm where dimension is less than 25.4mm.

#### Examples:

Tolerance for 19.00mm dimension is ±.25mm.

**Reason:** Although 19.00mm x ±.01 is

±.19mm, .25mm is the minimum.

Tolerance for 25.4mm is ±.25mm.

**Reason:** 25.4mm x ±.01mm = ±.25mm.

Tolerance for 38.1mm is ±.38mm.

**Reason:** 38.1mm x ±.01mm = ±.38mm.

### Tolerances for Metric dimensions given to one decimal place.

±.5mm per each 25.4mm of length (.02 mm per mm). Minimum is ±.5 where dimension is less than 25.4mm.

#### Examples:

Tolerance for 19.0mm dimension is ±.5mm.

**Reason:** Although 19.0mm x ±.02mm

= ±.38mm, ±.5mm is the minimum.

Tolerance for 25.4mm dimension is ±.5mm.

**Reason:** 25.4mm x ±.02mm = ±.5mm.

Tolerance for 38.1mm dimension is ±.76mm.

**Reason:** 38.1mm x ±.02mm = ±.76mm.

Caplugs are subject to design improvement through dimensional changes without notification.

# MATERIAL SELECTION BY TEMPERATURE

## Service Temperatures for Stock Caplugs

(appropriate Caplugs series shown in parentheses)

<b>175°F 79°C</b>	.....	Low Density Polyethylene*
<b>140°F 60°C</b>	.....	Ethylene Vinyl Acetate (DCC, BPF-5mm, BPF-6mm, BPF 1/4)

\*(BP, BPF, CBC, CBW, CCF, CD, CEC, CEG, CEP, COF, CPT, CSW, DP, EC, EGL-22, EMC, EP, FC, FCO, FCR, FF, FP, GC, HC, HSF, J, JS, K, L, MJ, MJS, PC, PD, PDE, PDF, PDI, PIP, PIP-Tab, PM, RC, RCL, RER, RH, RJ, SC, SEC, SEP, SF, SFP, SH, SQR, STP, SW, T, UTP, W, WW, WWX)

Each Caplugs product is manufactured from a unique group of materials with different properties and characteristics. If your product protection application will be exposed to extreme high temperatures or corrosive environments during processing or finishing operations, you must select a Caplugs product made of the proper material to withstand those conditions. For instance, when masking parts during paint baking, shot blasting, powder coating or plating processes, you should always use a Caplugs product made of high temperature-resistant materials.

The illustration above depicts the intermittent temperature resistance characteristics of the entire list of Caplugs materials. For complete service temperature information and other physical properties of Caplugs materials, consult the Material Data Chart on page 10. And, of course, take advantage of our free samples to test a part in your specific application before ordering.

Most Caplugs materials are produced in a standard color, which is noted on the product information page for each specific series. As some materials are available in different colors, please see page 13 for Standard Color Options.

Note: Most vinyl products are also available in HiTemp, Medical Grade and Static Dissipative Vinyl. Most Low Density Polyethylene products are also available in FlexTemp material. For any special material requests, please consult the factory for further information.

# PRODUCT INTRODUCTION

## Specifications and Dimensions

The following section details the specifications and dimensions necessary to help you properly select the Caplugs part to suit your application. All standard parts are listed in a user-friendly format, designed to help locate your product protection solution quickly and easily.

Caplugs products in this section are organized according to type of product:

### Caps

- Non-threaded
- Vinyl products
- Threaded

### Plugs

- Non-threaded
- Vinyl products
- Threaded

### Edge Liners and Grommets

### Wrapping Tapes and Disks

### Netting

The Product Specification and Dimension pages contain the following:

- Photo and description of each product series
- Standard material and color
- Product diagram
- Applicable military and NAS specifications (for full list, refer back to page 12)
- Part number dimensions listed by size, including inside or outside diameters, thread size and other essential dimensions
- Number of pieces in a standard carton and Mini Pak

If you do not find what you need in this section, Caplugs has full custom capabilities to create the product protection solution to meet your requirements. Consult pages 8 and 9 for more information on our custom capabilities.

# CAPS non-threaded

## T Series Tapered Caps

Tapered Caplugs can be used as either caps or plugs. Because they are tapered in design and made from highly pliable (or flexible) polyethylene, they can not only be applied to fit snugly but are also readily removable. Especially recommended for use on MIL Std. and SAE-type tube and hydraulic fittings and for threaded external and internal NPT fittings.

Popular size Tapered Caplugs are stocked also in green FlexTemp, a flexible thermoplastic rubber for extreme temperature applications ranging from -90°F to 300°F (-68°C to 149°C).

**MATERIAL:** Low Density Polyethylene  
**COLOR\*:** Red

## T Series

**WHEN CAPPING**  
 "C" Dim. must be at least 1% smaller than diameter to be capped.  
 Minimum .020".

Note: part number in *red italics* also available from stock in FlexTemp/Green

# non-threaded CAPS

Applicable Specs.: MIL-C-5501/7 (MIL-C-52078), NAS-834

**WHEN CAPPING**  
"C" Dim. must be at least 1% smaller than diameter to be capped. Minimum .020".

# CAPS non-threaded

## WW Series Tapered Caps with Wide, Thick Flanges

Accepted by the aircraft industry, Series WW Caps are designed with a wide, thick flange to insure against being erroneously forced "all the way through" when used as a plug. Available in fifty-four sizes, this versatile part may easily be used as a cap or plug depending upon application.

**MATERIAL:** Low Density Polyethylene  
**COLOR\*:** Yellow

# non-threaded CAPS

Applicable Specs.: *NSA STND, NAS-816*

**WHEN CAPPING**  
 "C" Dim. must be at  
 least 1% smaller than  
 diameter to be capped.  
 Minimum .020".

# CAPS non-threaded

## W Series Tapered Caps with Wide Flanges

Featuring a wider flange than standard Tapered Caplugs, the Series W offers added protection for bearing surfaces and cannot be accidentally pushed all the way into or through an opening being plugged.

MATERIAL: Low Density Polyethylene  
COLOR: Red

## WWX Series Tapered Caps with Extra-Wide, Extra-Thick Flanges

The extra-wide flange of the WWX Series provides extended visibility. This dummy-proof design prevents the mating component from being installed without first removing the cap. Available in thirteen sizes, this versatile part may easily be used as a cap or plug depending on application.

MATERIAL: Low Density Polyethylene  
COLOR: Yellow

# non-threaded CAPS

**WHEN CAPPING**  
"C" Dim. must be at least 1% smaller than diameter to be capped. Minimum .020".

# CAPS non-threaded

## EC Series Caps for Threaded Connectors

Made to protect threaded connectors, Series EC Caps are designed for easy application and removal in areas not readily accessible. They can be installed over threads or cylindrical surfaces.

**MATERIAL:** Low Density Polyethylene  
**COLOR\*:** Red

## HC Series Plastic Hose Caps

Series HC Plastic Hose Caps are used to cover rigid tube and hose ends, as well as to prevent slippage over the fitting. The primary application for these caps is hose assembly manufacturing.

**MATERIAL:** Low Density Polyethylene  
**COLOR\*:** Yellow

## FCO Series Flat Faced O-Ring Caps

Series FCO Flat Faced O-Ring Caps are designed to cap the outside of hexnuts. Featuring a chamfered flange for easy hand removal, these caps fit snugly to minimize the chance of falling off during transit. Available in two styles, Series FCO is ideal for fluid power valves and hose and pipe fittings.

**MATERIAL:** Low Density Polyethylene  
**COLOR\*:** Red

# CAPS non-threaded

## SC Series Sleeve Caps for Tube Ends

Series SC Sleeve Caps are designed to fit outside diameters of tubing sizes listed with a snug friction grip. Available in 59 different O.D.s and lengths, the SC Series is ideal for capping and protecting both threaded and non-threaded tubing or rod ends. They also make excellent masks for painting, plating or grit-blasting operations.

MATERIAL: Low Density Polyethylene  
COLOR\*: Red

# CAPS non-threaded

## RC Series Caps for Threaded Connectors

Originated for the automotive and air conditioning industries, Series RC Caps are suitable for a multitude of applications. They can be installed to fit threaded or smooth cylindrical surfaces.

MATERIAL: Low Density Polyethylene  
COLOR\*: Red

## RCL Series Caps for Long Threaded Connectors

Series RCL Caps are ideal for protecting threaded or smooth cylindrical surfaces. Originally designed for use on hydraulic double threaded bulkhead fittings, they are especially suitable where greater longitudinal protection is required.

MATERIAL: Low Density Polyethylene  
COLOR\*: Red

## FC Series Caps for Flareless Tube and Nut Assemblies

Featuring a "cap within a cap" design, Series FC closures can be easily applied to flareless hydraulic tube and nut assemblies. As the FC Cap is pushed on the nut, the "outer cap" conforms to the hex shape of the nut while the "inner cap" covers the tube and sleeve inside the nut to hold the assembly firmly in place.

MATERIAL: Low Density Polyethylene  
COLOR\*: Red

# CAPS non-threaded

## J Series Tear-Tab Caps for NPT Pipe Threads

Time-saving Series J Tear Caps slip easily over male NPT fittings and snap in place. Locking bead engages lead thread, holds cap on securely. Tear-Tab breaks seal for easy removal.

MATERIAL: Low Density Polyethylene  
COLOR\*: Blue

## JS Series Tear-Tab Caps for Straight Threads

EXPANDED

Series JS Tear Caps for straight threads feature an extra-wide tab with gripping ribs on both top and bottom, making it easy to grab and tear off. Standard color for the JS is black.

MATERIAL: Low Density Polyethylene  
COLOR\*: Black

## MJS Series Tear-Tab Caps for Metric Threads

Series MJS Tear Caps for straight threads feature an extra-wide tab with gripping ribs on both top and bottom, making it easy to grab and tear off. The Series MJS fits metric threads. Standard color for the MJS is translucent gold, making it possible to view an O-ring on the fitting.

MATERIAL: Low Density Polyethylene  
COLOR\*: Gold

## MJ Series Tear-Tab Caps for Tapered Metric Threads

NEW

Series MJ Tear-Tab Caps slip easily over metric threads and snap in place. Locking bead engages lead thread and holds cap on securely. Tear-tab breaks for easy removal.

MATERIAL: Low Density Polyethylene  
COLOR: Red

# CAPS non-threaded

## PTC Series Tapered Paper Caps for Use in Capping

Manufactured from natural paper which is 100% recyclable, Series PTC Paper Capplugs are the answer for applications requiring "environmentally-friendly" components. These closures will withstand temperatures up to 400°F (204°C), making them ideal for high-temperature applications which may degrade typical plastic caps.

MATERIAL: 90 lb. Paperboard  
COLOR: Natural

## PSC Series Straight Paper Caps for Use in Capping Flared Tube Fittings

PSC Series Paper Capplugs are manufactured from "environmentally-friendly" natural paper formulated from a blend of 90% virgin pulp and 10% post-consumer recycled paper. They are 100% recyclable. These closures will withstand temperatures up to 400°F (204°C), making them ideal for high-temperature applications which may degrade typical plastic caps.

MATERIAL: 90 lb. Paperboard  
COLOR: Natural

## GC Series Grease Caps

Series GC Grease Caps snap securely over fittings to seal out dirt and moisture. Integral retaining ring keeps cap in place during servicing. Color coding may be used to indicate type and/or frequency of lubrication. Caps also make good masks for spray painting. Available in two styles.

MATERIAL: Low Density Polyethylene  
COLOR\*: Red, Blue, Yellow, Green, Black, White

## CBC Series Coaxial Cable Connectors

Series CBC Coaxial Cable Connector Caps are used to protect cable connectors during packaging and shipping. Designed to fit a nominal 3/8" diameter, these tethered caps snap securely to keep out dirt and moisture.

MATERIAL: Low Density Polyethylene  
COLOR\*: Black

# CAPS non-threaded

## SFC Series Silicone Flange Caps

Series SFC Flange Caps feature a design which simplifies the application and removal of the cap. An internal lip on the open end provides a positive seal to prevent paint and other contaminants from seeping onto the part. A flanged head enables the cap to be manually removed with ease. Some sizes have provisions for venting air which may unseat the closure during processing at high temperatures.

**MATERIAL:** Silicone Rubber  
**COLOR\*:** Natural

Venting hole available only on SFC-156-32 and SFC-234-32

## SRC Series Silicone Rubber Caps

Silicone Rubber Capplugs are ideal for protecting and masking parts undergoing painting, plating, powder coating, anodizing, abrasive chemical processing, or exposure to high temperatures up to 600°F (316°C). Molded from a specially formulated grade of silicone rubber, these Capplugs contain no coloring agents which could bleed under high temperatures. SRC Series Silicone Rubber Caps are suited especially for covering studs, tube ends, and other projections.

**MATERIAL:** Silicone Rubber  
**COLOR\*:** Natural

# CAPS non-threaded

## SEC Series Electrostatic-Free Caps for Threaded Connectors

Static Dissipative SEC Series Caplugs provide positive ESD and physical protection for all common sizes of threaded electrical and electronic connectors. Also suitable for protecting non-threaded bayonet-type connectors.

**MATERIAL:** Static Dissipative Polyethylene  
**COLOR:** Pink

## CEC Series Conductive Caps

For all common sizes of threaded electrical and electronic connectors, Caplugs CEC Conductive Caps are also suitable for protecting non-threaded bayonet-type connectors. In addition to dissipating electrostatic charges, they provide an electrical shield over the end of the connector.

**MATERIAL:** Conductive Polyethylene  
**COLOR:** Black

\*\* All SEC Static Dissipative Caplugs and CEC Conductive Caplugs are packaged in static dissipative poly bags.

# CAPS non-threaded

## DCC Series Static Dissipative and Conductive Protectors for D-Subminiature Connectors

DCC Series Caplugs are designed to provide electrostatic discharge protection of rectangular D-Subminiature input/output-type connectors. Molded with an integral flange to enable easy application and removal, Series DCC is available in either black conductive polyethylene or pink static dissipative ethylene vinyl acetate.

**MATERIAL:** Static Dissipative Ethylene Vinyl Acetate or Conductive Polyethylene  
**COLOR:** Pink or Black

## EMC Series Static Dissipative and Conductive Protectors for Electro Miniature Connectors

EMC Series Caplugs fit 68-pin SCSI connectors and 50-pin Champ-type connectors. Series EMC is available in either black conductive polyethylene or pink static dissipative ethylene vinyl acetate.

**MATERIAL:** Static Dissipative Ethylene Vinyl Acetate or Conductive Polyethylene  
**COLOR:** Pink or Black

## DP Series Conductive Caps

DP Series Conductive Caplugs are designed to dissipate electrostatic charges, provide mechanical protection and an electrical shielding for ITT Cannon-style connectors commonly used in aerospace and military applications.

**MATERIAL:** Conductive Polyethylene  
**COLOR:** Black

# WRAPS & DISCS

## MTS Series Silicone Masking Tape for Powder Coating

Series MTS Masking Tape is a silicone rubber masking tape which bonds to itself, making it ideal for applications where dust-collecting adhesive residues are undesirable. In addition to withstanding temperatures up to 500°F (260°C), it is an excellent electrical insulator.

**MTS Red Masking Tape**

**Material:** Silicone  
**Thickness:** 20 Mil  
**Color:** Red  
**Temperature:** 500°F (260°C)

## DR Series Ding Ring Wrap-Arounds

Developed as a quick, effective means of protecting gear and tube sections, Series DR Ding Ring wrap-around protectors are both ruggedly designed and easy to use. These universally adjustable rings come in one size capable of wrapping up virtually any size tube diameter. The soft, thick vinyl material offers excellent impact protection, preventing many of the dents and scratches often caused by contact with tools or handling racks. The reusable Series DR Ding Rings can be easily cleaned using a mild detergent. As a result, they can be used hundreds of times to provide years of product protection.

**MATERIAL:** Flexible PVC  
**COLOR\*:** Red

# NETTING

## SW Series Standard Duty Tubular Sleeve-Web® Netting

Standard Duty Sleeve-Web provides low-cost protection against physical damage to exterior surfaces of machined, polished, plated, coated, or threaded cylindrical parts. Its elasticity ensures a snug fit and a nonslip grip on straight-sided parts and those with tapered or varying contours. Web thickness is approximately .070" (1.78 mm).

MATERIAL: Low Density Polyethylene  
COLOR\*: See table on page 125

## SW Series Light Duty Tubular Sleeve-Web® Netting

Light Duty Sleeve-Web provides light duty protection. Ideal for irregular-shaped parts, it stretches easily to twice its diameter, while its elastic properties allow it to pull tightly around the smaller sections. Provides inexpensive, attractive, easily applied wrapping for long, narrow items such as wires, glass rods, tubing, and rolled paper. Web thickness is approximately .060" (1.52 mm).

MATERIAL: Low Density Polyethylene  
COLOR\*: See table on page 125

## SW Series Heavy Duty Tubular Sleeve-Web® Netting

Heavy Duty Sleeve-Web has a thicker extrusion, more strands, and closer spacing. It offers an extra measure of protection for valuable precision components like heavy duty truck parts, screw cylinders, spline shafts, couplings, roller bearing assemblies, pistons, and heavy threaded fittings. Eliminates the high cost and time-consuming labor associated with traditional protective wrappings like paper, cardboard, styrofoam or wood. Web thickness is approximately .080" (2.03 mm).

MATERIAL: Low Density Polyethylene  
COLOR\*: See table on page 125

# NETTING

## PM Series Flat Sheet Netting

Flexible Series PM Net Sheetting provides excellent protection from impact or abrasion damage. Use as a separator for stacked parts during storage, handling and shipment, or as protective wrap for bulky items. Unlike wood, styrofoam or cardboard, it will not deteriorate in contact with solvents, coatings, slushing oils or rust-inhibitors.

**MATERIAL:** Low Density Polyethylene  
**COLOR\*:** See table on page 127

## CSW Series Sleeve-Web® Netting

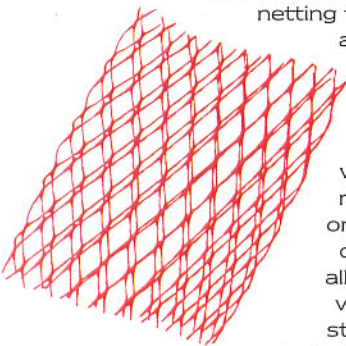

CSW Series Sleeve-Web® Netting conforms snugly around oxygen, acetylene and propane tanks, providing protection against unsightly scratches, minimizing rust build-up, and increasing time between repainting tanks. It also protects D.O.T.-mandated precautionary labels on gas cylinders from damage or accidental removal during handling.

**MATERIAL:** Low Density Polyethylene  
**COLOR\*:** Natural/Clear

## CBW Series Cut Bottle-Web Netting

Series CBW is a tough yet flexible netting that provides surface and impact protection for bottles of any size and shape. Since the netting is extruded rather than woven, the strands will not separate, weaken or spread unevenly. The diamond mesh design allows for production in a wide range of strengths, stretch capabilities and elasticity to satisfy all types of protection needs.

**MATERIAL:** Low Density Polyethylene  
**COLOR\*:** Natural

# EDGE LINERS & GROMMETS

## GRO Series Grommets for Holes in Sheet Metal

Mechanical protection for hoses, tubing, shafts, rods, and cables as they pass through holes in sheet metal is provided by Series GRO grommets. Easily snapped in place, they are held securely by a molded bead until deliberately removed. U.L. approved for applications up to 221°F (105°C).

**MATERIAL\*:** Flex Temp  
**COLOR\*:** Black

## TES Series Tamper-Evident Seal

Series TES Tamper-Evident Seals provide a positive, self-locking chain that breaks upon activating, thereby indicating that the seal, lock, or device has been disturbed.

**MATERIAL\*:** Polypropylene  
**COLOR\*:** Black, Blue, Brown, Green, Orange, Pink, Purple, Red, White, Yellow

## MTG, MTB, MTK Series Polyester and Polyimide Masking Tape for Powder Coating

Caplugs High Temperature Masking Tapes are ideal for masking applications during powder coating, plating and finishing. Series MTG is a 2-Mil polyester film backing with a 1.5-Mil silicone adhesive that offers superior resiliency at temperatures up to 400°F (204°C). Series MTB, a thinner (0.75-Mil polyester film/2.25-Mil adhesive) version of MTG, is stocked in a blue color and is ideal for masking curved surfaces. Series MTK, with a Kapton® polyimide film backing, will withstand temperatures up to 500°F (260°C).

### SPECIFICATIONS:

#### MTG Green Masking Tape

	Backing	Adhesive
Material:	Polyester	Silicone
Thickness:	2.0 Mil	1.5 Mil
Color:	Green	Clear
Temperature:	400°F (204°C)	

#### MTK Gold Kapton® Masking Tape

	Backing	Adhesive
Material:	Polyimide	Silicone
Thickness:	1.0 Mil	1.5 Mil
Color:	Gold	Clear
Temperature:	500°F (260°C)	

#### MTB Blue Masking Tape

	Backing	Adhesive
Material:	Polyester	Silicone
Thickness:	0.75 Mil	2.25 Mil
Color:	Blue	Clear
Temperature:	400°F (204°C)	

## MDG, MDK Series Polyester and Polyimide Masking Discs for Powder Coating

Caplugs Masking Discs are available from stock in two styles: Series MDG, a 2-Mil polyester film backing with a 1.5-Mil silicone adhesive that offers a superior resiliency at temperatures up to 400°F (204°C); and Series MDK, which has a Kapton® polyimide film backing that will withstand temperatures up to 500°F (260°C). Caplugs Masking Discs have broad applications in powder coating, electroplating, chrome plating, anodizing and solder wave applications.

#### MDG Green Masking Disc

	Backing	Adhesive
Material:	Polyester	Silicone
Thickness:	2.0 Mil	1.5 Mil
Color:	Green	Clear
Temperature:	400°F (204°C)	

#### MDK Gold Kapton® Masking Disc

	Backing	Adhesive
Material:	Polyimide	Silicone
Thickness:	1.0 Mil	1.5 Mil
Color:	Gold	Clear
Temperature:	500°F (260°C)

# PLUGS threaded

## ADP Series Threaded Aluminum Plugs For Flareless Tube And Hose Assemblies

Series ADP Plugs have a dimpled nose section that forms a low-pressure seal with flareless tube ends. The addition of a neoprene shoulder gasket enables the ADP-GN to provide a positive seal on the spot-face of the O-ring port. Gaskets are also optionally available in Butyl or Buna N rubber.

MATERIAL: 3003-0 Aluminum Alloy  
COLOR: Natural

## AFO Series Threaded Aluminum Plugs For Flat-Faced O-Ring Hydraulic Fittings

Series AFO Plugs are designed for positive, metal-to-metal threaded protection of fluid lines and fittings. Available with optional neoprene gaskets. Sealing gaskets are also available in Butyl or Buna N rubber.

MATERIAL: 3003-0 Aluminum Alloy  
COLOR: Natural

## ASP Series Threaded Aluminum Plugs for 37° Flared Fittings and Straight-Threaded Ports

Designed for protection of 37° flare fittings and straight-threaded ports, the Series ASP Plug has a nose section that seals on flared fittings without a gasket. The ASP-GN has an added neoprene shoulder gasket for low-pressure sealing of threaded ports. Butyl or Buna N gaskets are also available.

MATERIAL: 3003-0 Aluminum Alloy  
COLOR: Natural

## BSP Series Plastic Threaded Plugs For British Standard Pipe Fittings

Series BSP Plugs provide positive protective sealing on ports threaded for British Standard Pipe fittings. A unique flange compression seal prevents leakage of residual fluid. Designed for easy finger installation, a 12-point head enables socket or wrench tightening for a positive seal.

MATERIAL: Polypropylene  
COLOR\*: Yellow

# threaded PLUGS

Applicable Specs.: MIL-C-5501/2, NAS-842

# PLUGS threaded

## RP Series Threaded Plugs

Originated for automotive and air conditioning tube fittings, Series RP is a general-purpose, high-strength, machine thread plug adaptable to a multitude of applications. Serrated for finger tightening, they also have a slotted hex head for screwdriver, nutdriver or wrench installation where desired.

**MATERIAL:** Polypropylene  
**COLOR:** RP\*, Red  
RP-M\*, White

**SERRATED EDGE**      **SCREWDRIVER SLOT**

## RPO Series Threaded Plugs

Series RPO Plugs provide a positive dual seal on SAE straight threaded ports. Integral O-ring-type bead seats into bevel of threaded opening to prevent oil or fluid leakage. A lip on the flange compresses against the surface to keep contaminants from the spot face. Slotted, 12-point head for screwdriver, socket or wrench tightening.

**MATERIAL:** High Density Polyethylene  
**COLOR:** Red

**12-point head for socket or wrench tightening**      **SCREWDRIVER SLOT**

## RPO-M Series Threaded Plugs

Series RPO-M Plugs provide dual seals on ISO fluid power system metric ports. An integral O-ring-type bead seats snugly into the bevel of the threaded opening to prevent oil or fluid leakage. A 12-point head makes it possible to tighten with socket or wrench.

**MATERIAL:** Polypropylene  
**COLOR:** Green

## UTP Series Universal Thread Plugs

Series UTP Universal Thread Plugs offer unique flexibility. Each plug is designed to fit many different thread sizes. Series UTP is excellent for easy installation by just pushing the plug into a female threaded port. A small turn is all that's required to lock the plug in place.

**MATERIAL:** Low Density Polyethylene  
**COLOR:** Red

# EDGE LINERS & GROMMETS

## EGL Series Edge Liners for Sheet Metal and Pipe Ends

The Caplugs Edge Liner offers a convenient method for covering the sharp edges of large or irregularly shaped holes in sheet metal. It is pressed in place around the perimeter of the hole. Series EGL-22 is designed specifically to provide spacers when stacking sheet metal or board to protect the face of the sheet against scratches, allow for air circulation between sheets, and protect workers' hands against sharp edges.

**EGL-11-2**

## CEG Series Conductive Edge Liners

Series CEG Edge Liners securely grip each contact of edgeboard connectors and are also used for single in-line devices. These extruded conductive edge liners are the most cost-effective way to provide both ESD and physical protection for circuit boards and sub-assemblies.

**MATERIAL:** Conductive Polyethylene  
**COLOR:** Black

# PLUGS threaded

## PDO Series Plastic Threaded Plugs for SAE O-Ring Ports

Series PDO Plugs provide positive sealing for SAE straight-threaded O-ring-type ports and MIL-MS-33649 bosses on fluid power components. Integral O-ring type bead seats in the level of the port to prevent oil leakage or entrance of contaminants. Seal at outside of knurl protects port face against paint and dirt.

MATERIAL: High Density Polyethylene  
COLOR\*: Red

## PDI Series Threaded Plastic Plugs for Inverted Flared Fittings

Series PDI Plugs are made for use on inverted flared fittings. Knurled for ease of application, they will seal with light finger tightening. Series PDI Plugs will seal boss type fittings without gaskets.

MATERIAL: Low Density Polyethylene  
COLOR\*: Red

## PDE Series Plastic Threaded Plugs for Flareless Tube and Nut Assemblies

Knurled for ease of application, Series PDE Plugs are designed to fit MS-21921 tube and nut assemblies interchangeably. They can be installed with light finger tightening to seal beyond normal requirements.

MATERIAL: Low Density Polyethylene  
COLOR\*: Red

## PD Series Threaded Plastic Plugs for Flared JIC Fittings

Series PD Plugs, designed for use on flared JIC fittings, are knurled for ease of application. They will seal low pressure requirements with light finger tightening. PD Plugs can be used to seal 37° flare fittings without gaskets.

MATERIAL: Low Density Polyethylene  
COLOR\*: Red

4, 6, OR 8 RIBS  
EQUALLY SPACED

## PDF Series Threaded Plastic Plugs for Flat-Faced O-Ring Hydraulic Fittings

Series PDF Plugs are designed for easy mechanical or hand installation on flat-faced O-ring fittings.

MATERIAL: Low Density Polyethylene  
COLOR\*: Red

## MSP Series Slotted-Head Plastic Plugs For Metric-Threaded Ports

Series MSP Plugs feature two concentric, raised rings on the underside of the flange to provide positive sealing around metric-threaded ports. A cross-slotted head makes it easy to tighten with a screwdriver.

MATERIAL: High Density Polyethylene  
COLOR\*: Green

## SQR Series Plugs for Square Tubing

Series SQR Square Plugs feature a series of externally tapered ribs designed to accommodate a wide range of tubing gauges while also satisfying the fit adjustments on tubing with inside dimensional fluctuations. The exterior ribs are designed to provide a sure grip inside a tube without the unsightly plastic shavings found on many straight wall glide installations.

**MATERIAL:** Low Density Polyethylene  
**COLOR\*:** Black

## RER Series Plugs for Rectangular Tubing

Featuring the same external rib design of Series SQR Square Plugs, Series RER Rectangular Plugs are offered in a broad selection of width to length proportions to fit many special tubing shapes found on stands for computer terminals and office machines, display fixtures, and similar metal furnishings and equipment. Durable construction ensures exceptional performance in business and commercial applications.

**MATERIAL:** Low Density Polyethylene  
**COLOR\*:** Black

## CCF Series Plugs for Round Tubing

Durable construction and excellent gliding characteristics recommend Series CCF Round Plugs for use on a wide range of metal furniture, appliances, and similar items. Because they feature the same external rib design of Series SQR Square and Series RER Rectangular Plugs, a secure fit is ensured. A thick, impact- and abrasion-resistant base makes Series CCF plugs ideal tubing closures for products subject to heavy duty service or exposure to adverse environments. None of Caplugs Rib-Lok Load-Bearing Furniture Glides are subject to rust or corrosion.

**MATERIAL:** Low Density Polyethylene  
**COLOR\*:** Black

# PLUGS Polaris Vinyl

## TP Series Tapered Vinyl Plugs

Series TP Vinyl Plugs are designed with a distinct tapered configuration, making them ideal for plugging small holes ranging in diameter from .070" to .343". Flexibility of the vinyl allows these plugs to push in and pull out easily.

They are color coded for ease of size identification.

MATERIAL: Vinyl  
COLOR\*: See Chart

## VTP Series Flexible Vinyl, Tapered Plugs

Series VTP Vinyl Plugs provide a snug fit when pushed into open ports, ensuring a tight closure that will not pop out accidentally during processing or shipping.

A simple tug on the flanged lip of an installed VTP breaks the seal for easy removal. The plugs are molded from a specially formulated, non-shredding vinyl that offers an attractive, high gloss finish to products.

MATERIAL: Vinyl  
COLOR\*: Red

# PLUGS non-threaded

## BP Series Button Plugs with Recessed-Type Heads

Series BP Button Plugs with recessed-type heads can be used for plugging holes in equipment made of sheet metal, such as automobile bodies, tanks, refrigeration units, etc.

Series BP Button Plugs can be snapped into holes easily and are held in place by a bead until deliberately removed.

**MATERIAL:** Low Density Polyethylene  
**COLOR\*:** Black

ENLARGED VIEW

## BPF Series Button Plugs with Flush-Type Heads

Series BPF Button Plugs with flush-type heads can be used for plugging holes in equipment made of sheet metal, such as automobile bodies, tanks, refrigeration units, etc. Series BPF Button Plugs can be snapped into holes easily and are held in place by a bead until deliberately removed.

*Used on a car doorjamb*

**MATERIAL:** Low Density Polyethylene  
**COLOR\*:** Black

\*\* BPF-5mm, BPF-6mm, BPF-1/4 and BPF-1/4-4 are EVA (ethylene vinyl acetate).

# PLUGS non-threaded

## FP Series Finishing Plugs for Square Tubing

Series FP closures are finishing plugs for square tubing. Sized for different gauges, their shoulders fit flush with tubing sides. In addition to keeping dirt and moisture out of sensitive areas, Series FP Plugs provide a clean finish to the square tube ends. They also protect against injury from sharp tubing edges.

**MATERIAL:** Low Density Polyethylene  
**COLOR\*:** Black

## PIP Series Push-In Plugs

Series PIP Plugs are designed to fit SAE thread sizes. These parts offer the convenience of a push-in plug with the plugging quality of a threaded plug.

**MATERIAL:** Low Density Polyethylene  
**COLOR\*:** Black

## PIP-TAB Series Push-In Plugs with Pull-Tab

Series PIP-Tab Plugs are designed to fit SAE thread sizes. These parts offer the convenience of a push-in plug with the plugging quality of a threaded plug. Series PIP-Tab also has a convenient pull-tab for easy removal.

**MATERIAL:** Low Density Polyethylene  
**COLOR\*:** Black

\* Consult the factory for other material/color options.

# PLUGS non-threaded

## STP Series Shallow Tube Plugs For Packaging Tubes

Series STP Shallow Tube Plugs are an ideal closure for container tubes used for packaging, shipping or mailing. They are designed to fit snugly in the tube end. The narrow flange ensures that there is no over-hanging projection to catch on other tubes.

**MATERIAL:** Low Density Polyethylene  
**COLOR\*:** White

## K Series Plugs For Round Tubing

Series K Tubing Plugs are especially designed for applications where the outside diameter of the closure should not exceed the outside diameter of the tubing. Flanges fit flush with outer walls of tubing, providing positive protection against moisture and dirt. Especially suitable for general purpose, Type K copper tubing, SAE Standard, J-528.

**MATERIAL:** Low Density Polyethylene  
**COLOR\*:** Red

## SFP Series Covers for Split-Flange Connections

Series SFP Covers are designed for use on SAE 3000 lb., four-bolt, split hydraulic flanges. The SFP cover protects the port and fits snugly and firmly into the opening with an integral surrounding apron protecting the flange surface.

**MATERIAL:** Low Density Polyethylene  
**COLOR\*:** Red

# PLUGS non-threaded

## SRP Series Silicone Rubber Plugs

SRP Series Plugs have a tapered design for ease in plugging ports and holes in parts undergoing painting, plating, powder coating, anodizing, abrasive chemical processing, or exposure to high temperatures up to 600°F (316°C). Smaller sizes are solid while larger parts (Caplug No. with an H suffix) have a hollow design.

MATERIAL: Silicone Rubber  
COLOR\*: Natural

## SPP Series Silicone Rubber Pull Plugs

SPP Series Pull Plugs are designed to provide complete and positive protection to female-threaded ports and to the inside walls of holes ranging from .091" diameter to .335" and in lengths from .62" to 1.00".

MATERIAL: Silicone Rubber  
COLOR\*: Natural

## SH Series Finishing Plugs for Socket Head Screws

Series SH Finishing Plugs keep foreign matter out of the screw head driving recess and the counterbore. Ideal for sanitary-type equipment, screws that need periodic resetting, production and maintenance spray painting and numerous other applications. Translucent polyethylene ensures visual identification of socket screws.

MATERIAL: Low Density Polyethylene  
COLOR\*: Natural

# PLUGS non-threaded

## SEP Series Electrostatic-Free Plugs for Threaded Connectors

SEP Plugs are designed to fit inside both threaded and non-threaded bayonet-type connectors. All static dissipative Caplugs provide a surface resistivity in the range of at least  $1 \times 10^9$  ohms/sq. but less than  $1 \times 10^{12}$  ohms/sq. They also meet the static decay test requirements of MIL-B-81705C, Type II.

MATERIAL: Static Dissipative Polyethylene  
COLOR: Pink

## CEP Series Conductive Plugs

Designed to plug the more popular sizes of both threaded and non-threaded, bayonet-type electrical and electronic connectors, CEP Conductive Plugs provide an electrical shielding as well as mechanical protection.

MATERIAL: Conductive Polyethylene  
COLOR: Black

## DP Series Conductive Plugs

DP Series Conductive Plugs are designed to dissipate electrostatic charges, and provide mechanical protection and an electrical shielding for ITT Cannon-style connectors commonly used in aerospace and military applications.

MATERIAL: Conductive Polyethylene  
COLOR: Black

# non-threaded PLUGS

**WHEN PLUGGING**  
"B" Dim. must be at least 1% larger than hole to be plugged. Minimum .020".

# PLUGS non-threaded

## EP Series Plugs for Threaded Connectors

Made to serve as dust and protective closures for threaded connectors, Series EP Plugs are designed for easy application and removal in areas not readily accessible. They can be installed to fit threaded or smooth cylindrical surfaces.

**MATERIAL:** Low Density Polyethylene  
**COLOR:** Yellow

## PTP Series Tapered Paper Plugs

Manufactured from natural paper which is 100% recyclable, PTP Series Paper Plugs are the answer for applications requiring "environmentally-friendly" components. The special paper used in the manufacture of Paper Capplugs is formulated from a blend of 90% virgin pulp and 10% post-consumer recycled paper. These closures will withstand temperatures up to 400°F (204°C), making them ideal for high-temperature applications which may degrade typical plastic plugs. The flexibility and tapered design of the PTP Series allow quick, easy installation and removal.

**MATERIAL:** 90 lb. Paperboard  
**COLOR:** Natural

## RJ Series Telephone Jack Plug

Contact factory for information on black conductive polyethylene plugs for protecting RJ telephone-type connecting jacks on computers.

**MATERIAL:** Conductive Polyethylene  
**COLOR:** Black

# PLUGS non-threaded

## L Series Lift-Tab Tapered Plugs

Having the same dimensions as standard Tapered Caplugs of like size, Series L Plugs offer the added convenience of an integral lift-tab which facilitates their removal. Since it extends above the plug body, the tab is easy to grasp. This is particularly advantageous with plugs in the smaller sizes and those installed in tight quarters or difficult to reach locations. A bead molded on the tab affords a positive grip. Pulling the tab exerts an off-center force which breaks the seal between plug and wall of opening, permitting instant withdrawal.

**MATERIAL:** Low Density Polyethylene  
**COLOR\*:** Red

## CPT Series Center-Pull Tab Tapered Plugs

Series CPT Plugs have the same configuration and dimensions of standard Tapered Caplugs but with an integral center-pull tab which facilitates insertion and removal of the plug. The tab extends well above the plug body, making it easy to grasp. Since the tab is molded fully into the end and side walls of the plug, it will not break off during plug removal. The concentric design of the CPT allows a straight-pull removal without disturbing O-ring fittings.

**MATERIAL:** Low Density Polyethylene  
**COLOR\*:** Red

**WHEN PLUGGING**  
"B" Dim. must be at least 1% larger than hole to be plugged. Minimum .020".

Note: part number in *red italics* also available from stock in FlexTemp/Green

# non-threaded PLUGS

Applicable Specs.: MIL-C-5501/7 (MIL-C-52078), NAS-834

**WHEN PLUGGING**  
 "B" Dim. must be at least 1% larger than hole to be plugged. Minimum .020".

# PLUGS non-threaded

## WW Series Tapered Plugs with Wide, Thick Flanges

Accepted by the aircraft industry, Series WW Plugs are designed with a wide, thick flange to insure against being erroneously forced "all-the-way-through" when used as a plug. Available in fifty-four sizes, this versatile part may easily be used as a cap or plug depending upon application.

**MATERIAL:** Low Density Polyethylene  
**COLOR\*:** Yellow

# non-threaded PLUGS

Applicable Specs.: NSA STND, NAS-816

WHEN PLUGGING  
"B" Dim. must be at  
least 1% larger than  
hole to be plugged.  
Minimum .020".

# PLUGS non-threaded

## W Series Tapered Plugs with Wide Flanges

Featuring a wider flange than standard Tapered Plugs, the Series W offers added protection for bearing surfaces, and cannot be accidentally pushed all the way into or through an opening being plugged.

MATERIAL: Low Density Polyethylene  
COLOR\*: Red

## WWX Series Tapered Plugs with Extra-Wide, Extra-Thick Flanges

Accepted by the aircraft industry, Series WWX has an extra-wide flange providing extended visibility. This dummy-proof design prevents the mating component from being installed without first removing the plug. Available in thirteen sizes, this versatile part may easily be used as a cap or plug depending on application.

MATERIAL: Low Density Polyethylene  
COLOR\*: Yellow

# CAPS threaded

## PC Series Plastic Threaded Caps for Pipe Ends

EXPANDED

Heavy wall polyethylene Series PC Caps ensure protection for threaded pipe ends. Extra length provides sealing on pipe surface beyond last thread. These caps not only protect the NPT threads from damage during handling and storage, but they also prevent moisture, debris and rodents from entering the pipe.

**MATERIAL:** Low Density Polyethylene  
**COLOR\*:** as shown in spec table

PC-3/8 thru PC-2

PC-6, -8 have ribbing  
PC-3, -3 1/2, -4, -5, -10, -12, are smooth  
Built-in thin membrane for optional venting

# PLUGS non-threaded

## T Series Tapered Plugs

Tapered Plugs are tapered in design and made from highly pliable (or flexible) polyethylene.

Not only can they be applied to fit snugly, but they can also be easily removed. Especially recommended for use on MIL Std. and SAE-type tube and hydraulic fittings and for threaded external and internal NPT fittings.

Popular size Tapered Plugs are stocked also in green FlexTemp, a flexible thermoplastic rubber for extreme temperature applications ranging from -90° F to 300° F (-68°C to 149°C).

**MATERIAL:** Low Density Polyethylene  
**COLOR\*:** Red

## T Series

Applicable Specs.: MIL-C-5501/7 (MIL-C-52078), NAS-834

# CAPS Polaris Vinyl

## VMF Series Vinyl Metal Frame Caps

Featuring a unique design that offers excellent protection for metal "U" shaped frames, Series VMF Vinyl "U" Metal Frame Caps greatly reduce the risk of others being cut by sharp metal edges.

**MATERIAL:** Vinyl  
**COLORS\*:** White, Black, Brown, Orange, Red, Green, Grey, Blue, Yellow

## VIF Series Vinyl "I" Metal Frame Caps

Featuring a unique design that offers excellent protection for metal "I" shaped frames, Series VIF Vinyl "I" Metal Frame Caps greatly reduce the risk of others being cut by sharp metal edges.

**MATERIAL:** Vinyl  
**COLORS\*:** White, Black, Brown, Orange, Red, Green, Grey, Blue, Yellow

## VAC Series Vinyl Angle Caps

Designed to cap angle iron, Series VAC Vinyl Angle Caps are available in a variety of sizes to protect the corners of metal frames, reducing the risk of others being cut by sharp metal edges. Series VAC is available in 9 standard colors.

**MATERIAL:** Vinyl  
**COLORS\*:** White, Black, Brown, Orange, Red, Green, Grey, Blue, Yellow – Call factory for colors in stock  
**AVAILABILITY:** Consult Factory

**Note:**  
• VAC Series has a maximum length of 2".

# CAPS Polaris Vinyl

## AN Series Vinyl Hex Caps

Designed for AN style fittings, Series AN Caps are easy to install and remove. Engineered with aerospace quality, these caps are available in all common hydraulic nut sizes. No tools are required to install Series AN Caps.

**MATERIAL:** Vinyl  
**COLORS\*:** White, Black, Brown, Orange, Red, Green, Grey, Blue, Yellow

## MS Series Vinyl Hex Caps

Series MS Caps, used for MS style fittings, are easy to install and remove. Engineered with aerospace quality, these caps are available in all common hydraulic nut sizes. No tools are required to install Series MS Caps.

**MATERIAL:** Vinyl  
**COLORS\*:** White, Black, Brown, Orange, Red, Green, Grey, Blue, Yellow

# CAPS threaded

## CD Series Threaded Plastic Caps for Flared JIC Fittings

Knurled for ease of application, Series CD Caps seal flared JIC fittings exceptionally well against dirt and moisture, as well as for masking during dipping, painting and plating.

MATERIAL: Low Density Polyethylene  
COLOR\*: Red

## ASC Series Threaded Aluminum Caps for Threaded, Flared Fittings

A standard aerospace and fluid power protective cap, the Series ASC has a nose-section design that forms a low-pressure seal on threaded, flared fittings. A more positive seal is possible with the addition of a sealing disc (Series ASC-DN). Stock sealing discs are Neoprene; Butyl or Buna N rubber are also available.

MATERIAL: 3003-0 Aluminum Alloy

OPTIONAL SEALING DISC

## VHC Series Vinyl Hanger Caps

Series VHC Vinyl Hanger Caps are round with a hanger tip. Ideal for tools that need to be hung, these caps provide a tight fit to prevent caps from falling off. Series VHC is available in 9 standard colors.

**MATERIAL:** Vinyl  
**COLORS\*:** White, Black, Brown, Orange, Red, Green, Grey, Blue, Yellow

**Note:**

- VHC Series has a maximum length of 2".

## VHR Series Vinyl Hanger Tips (round)

Series VHR Vinyl Hanger Tip Caps are round with a hanger tip that sits to the side, allowing parts to hang down smoothly. Designed for tools that need to be hung, these caps provide a snug fit to ensure caps do not fall off. Series VHC, available in small sizes, comes in 9 standard colors.

**MATERIAL:** Vinyl  
**COLORS\*:** White, Black, Brown, Orange, Red, Green, Grey, Blue, Yellow

**Note:**

- VHR Series has a maximum length of 2".

## VHF Series Vinyl Hanger Tips (flat)

Series VHF Vinyl Hanger Tips are rectangular caps with a flat hanger tip that provides a snug fit to ensure caps do not fall off. Ideal for tools that need to be hung, Series VHF is available in 9 standard colors.

**MATERIAL:** Vinyl  
**COLORS\*:** White, Black, Brown, Orange, Red, Green, Grey, Blue, Yellow – Call factory for colors in stock  
**AVAILABILITY:** Consult Factory

**Note:**

- VHF Series has a maximum length of 4".

# CAPS Polaris Vinyl

## VRR Series Vinyl Rectangular Caps & Grips (round end)

EXPANDED

Designed to fit most rectangular tubes and bars, Series VRR Vinyl Rectangular Caps and Grips feature a flat, rounded end. These caps have many applications, including handle grips, paint shields, end caps and ESD covers. They slip on quickly and easily, and maintain a snug fit. Printing is available for Series VRR, which comes in 9 standard colors.

**MATERIAL:** Vinyl  
**COLORS\*:** White, Black, Brown, Orange, Red, Green, Grey, Blue, Yellow – Call factory for colors in stock

**Note:**

- VRR-062x312 through VRR-062x1250 have various maximum lengths of up to 4".
- VRR-080x875 through VRR-500x1000 have various maximum lengths of up to 8".

New sizes are always being added.

## VOR Series Vinyl O-Rings

NEW

Series VOR Vinyl O-rings are designed to protect tube ends. Typically used in the automotive, scuba equipment and painting industries, these O-rings provide maximum protection against sharp edges. Available in several common sizes, Series VOR slip on easily and maintain a snug fit.

**MATERIAL:** Vinyl  
**COLORS\*:** White, Black, Brown, Orange, Red, Green, Grey, Blue, Yellow – Call factory for colors in stock

# CAPS Polaris Vinyl

## VF Series Vinyl Flange Covers

Series VF Vinyl Flange Covers seal out dust and moisture during shipment to protect flange surfaces. These covers are quick and easy to apply, and provide a snug fit for flanged and beaded tubes. Series VF is available in a variety of sizes.

**MATERIAL:** Vinyl  
**COLORS\*:** White, Black, Brown, Orange, Red, Green, Grey, Blue, Yellow – Call factory for colors in stock

(Not available in high temp material)

Also available in a more flexible, low durometer vinyl with standard color yellow. Consult factory.

## VAS Series Vinyl American Standard Association Flange Covers

Designed to accommodate most American Standard Association, Navy and Military sizes, Series VAS Vinyl Flange Covers protect flanges by sealing out dust and moisture during shipment. Series VAS is available in a wide range of sizes.

**MATERIAL:** Vinyl  
**COLORS\*:** White, Black, Brown, Orange, Red, Green, Grey, Blue, Yellow – Call factory for colors in stock

## VFC Series Flexible Vinyl Caps with Flat Pull-Tab for Easy Removal

Series VFC Caps feature a long flat tab centered at the top of the closure, which allows for easy removal of the cap.

**MATERIAL:** Vinyl  
**COLORS\*:** White, Black, Brown, Orange, Red, Green, Grey, Blue, Yellow – Call factory for colors in stock  
**AVAILABILITY:** Consult Factory

**Note:**

- VFC-180 through VFC-240 have a maximum length of 1.5".
- VFC-302 through VFC-1605 have various maximum lengths of up to 4".

# CAPS Polaris Vinyl

## VVC Vent-A-Cap™ Series Vinyl Vented Caps

The Vent-A-Cap Series consists of several styles of caps used to protect the ends of tubing connectors and instrument tips.

Vented for air release and easy removal, the vented caps are also useful in the masking industry. Venting for airflow assures that the cap won't pop off during extreme heat. Caps used in the medical

industry allow for airflow during ETO gas sterilization. Series 20, Series 22 and Series 26 are tapered to fit multiple sizes for a variety of tubing and instruments. Series 29 is offered in a straight style.

**MATERIAL:** Vinyl  
**COLORS\*:** White, Black, Brown, Orange, Red, Green, Grey, Blue, Yellow – Call factory for colors in stock

# CAPS Polaris Vinyl

## VCF Series Vinyl Caps with Flanges

Series VCF Vinyl Caps with Flanges ensure easy removal with a flange at the closed end that is small enough not to interfere, but large enough to grasp during removal. These caps are available in most of the Series VC sizes, and come in 9 standard colors.

**MATERIAL:** Vinyl  
**COLORS\*:** White, Black, Brown, Orange, Red, Green, Grey, Blue, Yellow – Call for colors in stock

(Not available in high temp material)

**Note:**

- VCF-125 has a maximum length of 1.5".
- VCF-140 through VCF-250 have a maximum length of 2".
- VCF-281 through VCF-3125 have various maximum lengths of up to 8". Call factory for details.

# CAPS Polaris Vinyl

## EZ Series Flexible Vinyl Caps with Pull-Tab for Easy Removal

Series EZ-Pull Vinyl Caps feature an extra long tab centered at the top of the closure which allows the cap to be finger-removed easily, eliminating the use of tools which could damage threads or part surfaces. Molded from a specially formulated and flexible vinyl which enables a snug fit on parts, thereby providing better protection against dirt, moisture and impact damage.

**MATERIAL:** Vinyl  
**COLORS\*:** White, Black, Brown, Orange, Red, Green, Grey, Blue, Yellow – Call factory for colors in stock

**AVAILABILITY:** Consult Factory

### Note:

- EZ-187 through EZ-240 have a maximum length of 1.5".
- EZ-240 through EZ-1480 have various maximum lengths of up to 4". Call factory for details.

All EZ Series parts are also available in special ergonomic pull-tab style EZ Series. Consult factory. (Not available in high temp material)

### EZ Series

## VFE Series Vinyl Caps with Flat Ergonomic Pull-Tab

Series VFE Caps feature a long, flat ergonomic pull-tab, which allows for easy removal. The ergonomic design offers an easier gripping surface and requires less pull for removal.

**MATERIAL:** Vinyl  
**COLORS\*:** White, Black, Brown, Orange, Red, Green, Grey, Blue, Yellow – Call factory for colors in stock

**AVAILABILITY:** Consult Factory

## FF Series Caps for Flanged and Flange-Mounted Fittings

Available in square, hexagonal, and triangular shapes, Series FF can be used with a variety of flanged and flange-mounted fittings. They effectively seal dirt out of the fitting and protect the flange surface against nicks and scratches. When fittings are provided with slip-on flanges, Series FF Caps keep the assemblies intact during handling and shipping.

MATERIAL: Low Density Polyethylene  
COLOR\*: Red

## HSF Series Caps for High Pressure Split-Flange Connections

Series HSF Caps are designed to protect high pressure split-flange hydraulic connections. These caps push on easily and fit securely with an internal bead providing a positive locking grip.

MATERIAL: Low Density Polyethylene  
COLOR\*: Natural

## SF Series Caps for Split-Flange Connections

Series SF Caps and Covers are designed to protect four-bolt split-flange connections. Series SF Caps push on easily and fit securely with an internal bead providing a positive locking grip. Because the SF Cap is made of natural, translucent polyethylene, the O-ring remains visible even after the closure is applied.

MATERIAL: Low Density Polyethylene  
COLOR\*: Natural

## FCR Series Finishing Caps for Round Tubing

Series FCR Caplugs are used for finishing ends of round tubing on numerous products such as furniture, lawn and garden equipment, tools and appliances. Heavy wall construction makes them ideal also for threaded connections where extra protection is required. Designed for easy installation, they seat with a firm grip that prevents accidental removal.

**MATERIAL:** Low Density Polyethylene  
**COLOR:** Black

## RH Series Finishing Caps for Raised Head Screws

Series RH Caplugs are combination finishing and protective caps for raised head screws. Plastic overcap snaps over a flanged steel washer, replacing conventional washer. Adding attractive finish to protruding screw heads, it also provides dual protection by preventing injury to personnel scraping against steel-sharp fastener edges and by keeping screw head slots free of foreign matter and paint.

**MATERIAL:** Low Density Polyethylene (washer – steel, zinc plate)  
**COLOR:** Black or White (White available in standard carton only.)

## COF Series Caps for Round Tubing and Rods

Series COF Round Caps make economical, attractive glides for everything from household and patio furniture to office chairs and tables, and from utility carts to exercise equipment. As finishing caps for both rods and tubing, they cover any scratches, burrs or distortions that may result from cutting operations. And they also provide protection against injury from sharp rod and tubing edges.

**MATERIAL:** Low Density Polyethylene  
**COLOR:** Black
