Reflow profile

Soldering condition

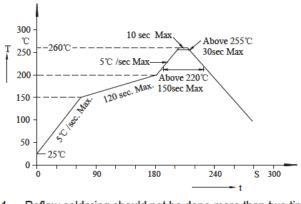

· Recommended soldering conditions

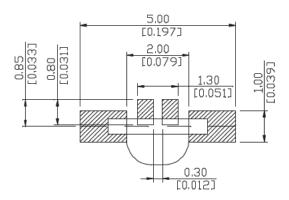

Reflow Soldering		Hand Soldering		
Pre-heat	160∼180℃	Temperature	300°C Max.	
Pre-heat time	120 seconds Max.			
Peak temperature	260°C Max.	Soldering time	3 second Max.	
Soldering time	10 seconds Max.		(one time only)	
Condition	Refer to Temperature-profile			

- After reflow soldering rapid cooling should be avoided
- Temperature-profile (Surface of circuit board)
 Use the following conditions shown in the figure.

IR-Reflow Soldering Profile for lead Soldering

RECOMMEND PAD DESIGN (Units: mm)

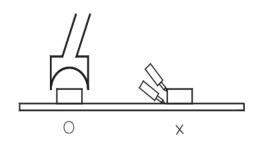

- 1. Reflow soldering should not be done more than two times
- 2. When soldering ,do not put stress on the LEDs during heating

■ Soldering iron

- 1. When hand soldering, keep the temperature of the iron under 300 °C, and at that temperature keep the time under 3 sec.
- 2. The hand soldering should be done only a time
- 3. The basic spec is ≤5 sec. when the temperature of 260 °C, do not contact the resin when hand soldering

■ Rework

- 1. Customer must finish rework within 5 sec under 260 °C
- 2. The head of iron can not touch the resin
- 3. Twin-head type is preferred.

Package specifications

Reeled products (numbers of products are 3,000pcs) packed in a seal off moisture-proof bag along with a desiccant one by one, Five moisture-proof bag of maximums (total maximum number of products are 15,000pcs) packed in an inside box (size: about 250mm x about 250 x about 68mm) and Five inside boxes of maximums are put the outside box (size: about 360mm x about 265mm x about 255mm) Together with buffer material, and it is packed. (Pare No., Lot No., quantity should appear on the label on the moisture-proof bag, part No. And quantity should appear on the label on the cardboard box.) The number of the loading steps of outside box (cardboard box) has three steps.

Storage conditions

Before opening the package:

The LEDs should be kept at 30° C or less and 70%RH or less. The LEDs should be used within a year. When storing the LEDs, moisture proof packaging with absorbent material is recommended.

After opening the package:

The LEDs should be kept at 30°C or less and 60%RH or less. The LEDs should be soldered within 168 hours (7days) after opening the package. If unused LEDs remain, they should be stored in moisture proof packages, such as sealed containers with packages of moisture absorbent material. It is also recommended to return the LEDs to the original moisture proof bag and to reseal the moisture proof bag again.
