

# Ceramic PTC Thermistors

CPTC Series

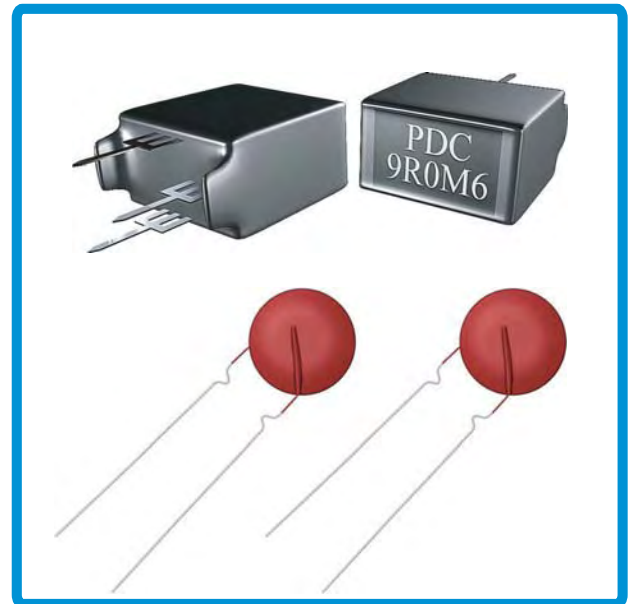

MERITEK

## FEATURES

- Various applications
- Stable performance over time
- Wide range of voltage ratings
- Resettable advantage for current protection
- Various switching temperature ratings
- Custom design available

## APPLICATIONS

- Degaussing: color TV, color monitor
- Motor starting: starting element, timer delay
- Temperature protection & sensing: Industrial electronics, power supply, fire alarm, liquid level indication
- Overload protection: Transformers, rechargeable batteries, household electronics (heater, hair dryer, washing machine), telecommunications (telephones, facsimiles and modems)

## CHARACTERISTICS

- Leaded or case type available
- Switching temperature range: 60°C - 180°C
- Operating voltage: 100V to 600V
- Please inquire for detailed specifications
