

Silicon Diode Rectifier Stacks

Application

- Welding Equipment
- Battery Chargers
- Galvanic Lines
- Electrolysers
- ...

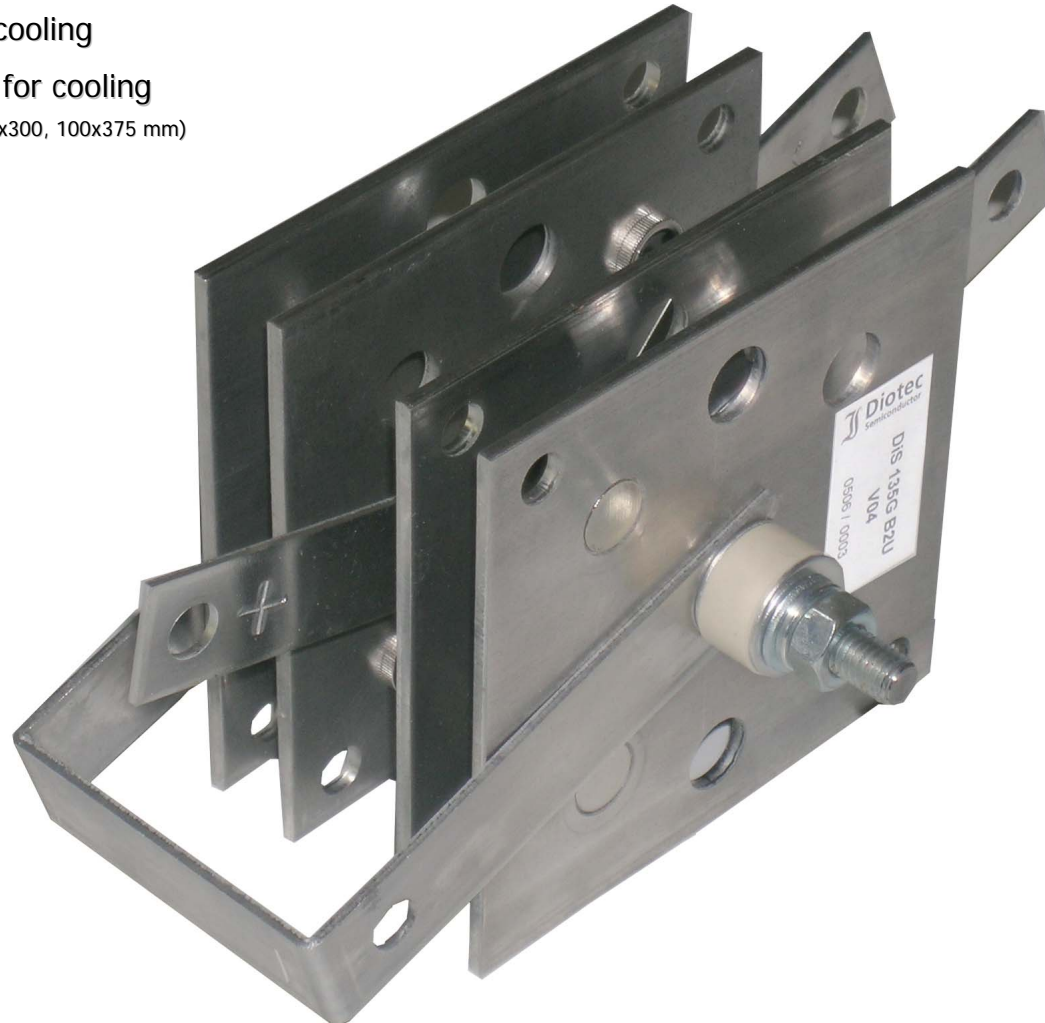

Features

- Various configurations (E1U, M2U, B2U, B6U...)
- Easy installation and replacement of already existing installations
- Easily scalable for power optimisation by adding more diodes or plates
- Possible adaptation of the terminals position on customer's request

Details

- Using special low forward voltage drop diode (400V)
- Output DC current up to 2000A
- Cooling mode: natural or forced air cooling
- Different size aluminum plates used for cooling
(100x100, 100x125, 100x140, 100x200, 100x250, 100x300, 100x375 mm)
