## Part Numbering

## Ceramic Trimmer Capacitors

| (Part Number) | TZ | Y2 | R | 200 | A | 001 | R00 |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| (1) | 2 | 3 | 4 | 5 | 6 | $\mathbf{7}$ |  |

(1)Product ID

| Product ID |  |
| :---: | :---: |
| TZ | Trimmer Capacitors |

(2)Series/Terminal

| Code | Series/Terminal |
| :---: | :---: |
| $\mathbf{0 3}$ | 6 mm Size Lead Type |
| B4 | 4 mm Size SMD/Lead Type |
| W4 | 4 mm Size SMD Type |
| C3 | 3 mm Size SMD Type |
| S2 | 2 mm Size SMD Type (Height 1.0 mm ) |
| Y2 | 2 mm Size SMD Type (Height 1.25 mm ) |
| V2 | 2 mm Size SMD Type (Height 1.45 mm ) |
| R1 | 1 mm Size SMD Type (Height 0.90 mm ) |

(3)Temperature Characteristics

| Code | Temperature Characteristics |
| :---: | :---: |
| $\mathbf{Z}$ | $\mathrm{NP0} \mathrm{ppm} /{ }^{\circ} \mathrm{C}$ |
| $\mathbf{S}$ | $\mathrm{N} 150 \mathrm{ppm} /{ }^{\circ} \mathrm{C}$ |
| $\mathbf{N}$ | $\mathrm{N} 200 \mathrm{ppm} /{ }^{\circ} \mathrm{C}$ |
| $\mathbf{T}$ | $\mathrm{N} 450 \mathrm{ppm} /{ }^{\circ} \mathrm{C}$ |
| $\mathbf{R}$ | $\mathrm{N} 750 \mathrm{ppm} /{ }^{\circ} \mathrm{C}$ |
| $\mathbf{K}$ | $\mathrm{N} 1000 \mathrm{ppm} /{ }^{\circ} \mathrm{C}$ |
| $\mathbf{P}$ | $\mathrm{N} 1200 \mathrm{ppm} /{ }^{\circ} \mathrm{C}$ |

Please refer to ratings for tolerance of temperature characteristics.
4. Maximum Capacitance

Expressed by three figures. The unit is pico-farad(pF). The first and second figures are significant digits, and the third figure expresses the number of zeros which follow the two numbers. If there is a decimal point, it is expressed by the capital letter "R". In this case, all figures are significant digits.
(5) Terminal Shape

| Code | Terminal Shape |
| :---: | :---: |
| $\mathbf{A}$ | Top Adjustment; TZR1,TZS2,TZY2,TZV2, <br> TZC3,TZW4,TZB4 (SMD Type) |
| $\mathbf{B}$ | Top Adjustment; TZB4 (SMD Type), <br> Rear Adjustment; TZ03 (Lead Type) |
| $\mathbf{C}$ | Top Adjustment; TZB4 (Lead Type) |
| $\mathbf{D}$ | Rear Adjustment; TZB4 (Lead Type) |
| $\mathbf{E}$ | Top Adjustment; TZ03 (Lead Type), <br> Rear Adjustment; TZB4 (SMD Type) |
| F | Top Adjustment; TZ03 (Lead Type) |

| $\mathbf{T}$ | Top Adjustment; TZ03 (Taping Type) |
| $\mathbf{Y}$ | Side Adjustment; TZ03 (Lead Type) |
| P |  |

Please refer to dimensions for terminals in detail.

## Selection Guide of Ceramic Trimmer Capacitor

## TZR1 Series

## - Features

1. Ultra-small and thin with external dimensions of $1.5(\mathrm{~W}) \times 1.7(\mathrm{~L}) \times 0.85(\mathrm{H}) \mathrm{mm}$ ( $80 \%$ less in volume than the current product).
2. Unique construction with no plastic material provides superior soldering heat resistance to maintain excellent characteristic performance after reflow soldering.
3. Suitable for high frequency circuit due to high self resonant frequency $(6.2 \mathrm{GHz}$ of TZR1Z010 at
 1.0 pF setting)

$\binom{$ Tolerance: $\pm 0.1}{$ in mm}

## Applications

1. "Bluetooth"
2. Crystal oscillators
3. Crystal filters
4. Hand radios
5. Miniature tuner packs (FM Radio, TV)
6. Remote keyless entry systems

## 7. Pagers

| Part Number | Cmin. (max.) <br> (pF) | Cmax. <br> (pF) | TC | Q | Rated <br> Voltage | Withstanding <br> Voltage |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
| TZR1Z010A001 | 0.55 | $1.0+100 /-0 \%$ | $N P 0 \pm 300 \mathrm{ppm} /{ }^{\circ} \mathrm{C}$ | 200 min. at $200 \mathrm{MHz}, \mathrm{Cmax}$. | 25 Vdc | 55 Vdc |

## ■ Land Pattern

## - Notice (Storage and operating condition)

1. Do not use the trimmer capacitor under atmosphere of RTV silicone rubber (Room Temperature Vulcanizing Silicone Rubber) except Acetone liberating silicone sealant.
2. Before using trimmer capacitor, please store under the condition of -10 to +40 degree C and 30 to 85\%RH.
3. Do not store in or near corrosive gasses.
4. Use within 6 months of deliverly.
5. Do not store under direct sunlight.
6. Do not use the trimmer capacitor under the conditions listed below.

## ■ Notice (Soldering and mounting)

1. Soldering
(1) TZR1 series can be soldered by reflow soldering method and soldering iron. Do not use flow soldering method (dipping).
(2) Standard soldering condition
(a) Reflow soldering: Refer to the standard temperature profile.
(b) Soldering iron:
$>$ Temperature of tip 260+-10 degree C
> Soldering time 3 sec . max.
> Diameter 0.5 mm max.
$>$ Wattage of iron 20W max.
Before using other soldering conditions than those listed above, please consult with Murata factory representative prior to using. If the soldering conditions are not suitable, e.g., excessive time and/or excessive temperature, the trimmer capacitor may deviate from the specified characteristics.
(3) The amount of solder is critical.
(4) The thickness of solder paste should be printed from 100 micro m to 150 micro m and the dimension of land pattern should be Murata's standard land pattern used at reflow soldering.
Insufficient amounts of solder can lead to insufficient soldering strength on PCB.
Excessive amounts of solder may cause bridging between the terminals or contact failure due to

## ■ Temperature Profile

(1) Corrosive gasses atmosphere (ex. Chlorine gas, Hydrogen sulfide gas, Ammonia gas, Sulfuric acid gas, Nitric oxide gas, etc.)
(2) In liquid (ex. water, oil, medical liquid, organic solvent, etc.)
(3) Dusty / dirty atmosphere
(4) Direct sunlight
(5) Static voltage nor electric/magnetic fields
(6) Direct sea breeze
(7) Other variations of the above
flux wicking up.
(5) When using soldering iron, the diameter of the string solder shall be less than 0.5 mm . The string solder shall be applied to the lower part of the terminal only. Do not apply flux except to the terminals. Excessive amounts of solder and/or applying solder to the upper part of the terminal may cause fixed metal rotor or the contact failure due to flux invasion into the movable part and/or the contact point. The soldering iron should not come in contact with the monolithic stator of the trimmer capacitor. If such contact does occur, the trimmer capacitor may be damaged.
(6) Our recommended chlorine content of solder is as follows.
(a) Solder paste: $0.2 \mathrm{wt} \%$ max.
(b) String solder: $0.5 \mathrm{wt} \%$ max.
(7) Do not use water-soluble flux (for water cleaning). To prevent the deterioration of trimmer capacitor characteristics, apply flux only to terminals.
2. Mounting
(1) Do not apply excessive force (preferable 5.0N (Ref.; 500gf) max.), when the trimmer capacitor is mounted on the PCB.
(2) Do not warp and/or bend PCB to prevent trimmer capacitor from breaking.
4. Other

Note the polarity of the trimmer capacitor to
minimize influence by stray capacitance.
(Refer to the dimensions concerning the polarity.)
is applied to the screwdriver slot, it may cause deformation of the products.
3. Do not apply adhesive, lock paints, or any other substances to the trimmer capacitor to secure the rotor position. They may cause corrosion or electrical contact problems.

## ■ Notice (Other)

Before using trimmer capacitor, please test after assembly in your particular mass production system.

## Ceramic Trimmer Capacitors

matrata
TZS2 Series

## ■ Features

1. Ultra-small and thin type with external dimensions of $2.2(\mathrm{~W}) \times 2.7(\mathrm{~L}) \times 0.95(\mathrm{H}) \mathrm{mm}$
(30\% less in volume from the current product).
2. Unique construction with no plastic material provides superior soldering heat resistance to maintain excellent characteristic performance
 after reflow soldering.
3. Pierced square hole allows for high resistance to tuning force and in-process automatic adjustment.

$\binom{$ Tolerance: $\pm 0.1}{$ in mm}

## Applications

1. Crystal oscillators
2. Crystal filters
3. Hand radios
4. Cordless telephones
5. Cellular telephones
6. Tuner packs
7. Pagers
8. Remote keyless entry systems
9. PHS
10. Radar detectors
11. W-LAN
12. Compact radios
13. Headphone stereos

## ■ Notice (Soldering and mounting)

1. Soldering
(1) TZV2 series can be soldered by reflow soldering method and soldering iron. Do not use flow soldering method (dipping).
(2) Standard soldering condition
(a) Reflow soldering: Refer to the standard temperature profile.
(b) Soldering iron:

TZV2R200

## Temperature Profile

(1) Corrosive gasses atmosphere
(ex. Chlorine gas, Hydrogen sulfide gas,
Ammonia gas, Sulfuric acid gas, Nitric oxide gas, etc.)
(2) In liquid (ex. water, oil, medical liquid, organic solvent, etc.)
(3) Dusty / dirty atmosphere
(4) Direct sunlight
(5) Static voltage nor electric/magnetic fields
(6) Direct sea breeze
(7) Other variations of the above

| tip | 26 |
| :---: | :---: |
| >Soldering time | 3 sec . max. |
| >Diameter | 1 mm max. |
| Wattage of iron | 20W |

Before using other soldering conditions than those listed above, please consult with Murata factory representative prior to using. If the soldering conditions are not suitable, e.g.,
$\searrow$ continued from the preceding page.
excessive time and/or excessive temperature, the trimmer capacitor may deviate from the specified characteristics.
(3) The amount of solder is critical.
(4) The thickness of solder paste should be printed from 120 micro $m$ to 170 micro $m$ and the dimension of land pattern should be Murata's standard land pattern used at reflow soldering.
Insufficient amounts of solder can lead to insufficient soldering strength on PCB. Excessive amounts of solder may cause the bridging between the terminals or the contact failure due to flux wicking up.
(5) When using soldering iron, the diameter of the string solder shall be less than 0.5 mm . The string solder shall be applied to the lower part of the terminal only. Do not apply flux except to the terminals. Excessive amounts of solder and/or applying solder to the upper part of the terminal may cause fixed metal rotor or contact failure due to flux invasion into the movable part and/or the contact point. The soldering iron should not come in contact with the monolithic stator of the trimmer capacitor. If such contact does occur, the trimmer
capacitor may be damaged.
(6) Our recommended chlorine content of solder is as follows.
(a) Solder paste: 0.2wt\% max.
(b) String solder: $0.5 \mathrm{wt} \%$ max.
(7) Do not use water-soluble flux (for water cleaning). To prevent the deterioration of trimmer capacitor characteristics, apply flux only to terminals.
2. Mounting
(1) Do not apply excessive force (preferable 5.0 N (Ref.; 500 gf ) max.), when the trimmer capacitor is mounted on the PCB.
(2) Do not warp and/or bend PCB to prevent trimmer capacitor from breakage.
(3) Use the suitable dimension of the pick-up nozzle (1.8mm external diameter and 1.3 mm bore diameter).
3. Cleaning

Cannot be cleaned because of open construction.
4. Other

Note the polarity of the trimmer capacitor to minimize influence by stray capacitance. (Refer to the dimensions concerning the polarity.)
excessive force (preferable 1.0 N (Ref; 100gf) max.) to minimize capacitance drift. If excessive force is applied to the screwdriver slot, it may cause deformation of the products.
3. Do not apply adhesive, lock paints, or any other substances to the trimmer capacitor to secure the rotor position. They may cause corrosion or electrical contact problems.

## ■ Notice (Other)

Before using trimmer capacitor, please test after assembly in your particular mass production system.

1. Use suitable screwdrivers that fit comfortably in driver slot.
(1) Recommended screwdriver for manual adjustment VESSEL: No.9000-0.9×30
(Murata P/N : KMDR020)
(2) Recommended screwdriver bit for automatic adjustment

MURATA: KMBT020
2. When adjusting with a screwdriver, do not apply

## ■ Notice (Handling)

(1) RecSSEL: No.9000-0.9x30 assembly in your particular mass production system.

## Ceramic Trimmer Capacitors

## TZC3 Series

## - Features

1. Small size with external dimension of $3.2(\mathrm{~W}) \times 4.5(\mathrm{~L}) \times 1.6(\mathrm{H}) \mathrm{mm}$ (Cross slot type: $1.7(\mathrm{H}) \mathrm{mm}$ )
2. Color coded stator permits easy identification of capacitance and reduces mounting errors.
3. Can be adjusted with conventional adjustment tools having a thickness of 0.5 mm .
. Available for cross slot type to provide better adjustability.

Standard Type
5. Providing mechanism to prevent air leak offers better mountability with automatic mounter.
(Cross slot type)
6. Designed for automatic placement in surface mount applications.
7. Heat resistant resin withstands reflow soldering temperatures.

## ■ Applications

2. Headphone stereos
3. Pagers
4. Portable radio equipments
5. Hybrid ICs
6. Cellular telephones
7. Cordless telephones
8. Remote keyless entry systems

## ■ Notice (Storage and operating condition)

1. Do not use the trimmer capacitor under atmosphere of RTV silicone rubber (Room Temperature Vulcanizing Silicone Rubber) except Acetone liberating silicone sealant.
2. Before using trimmer capacitor, please store under the condition of -10 to +40 degree C and 30 to 85\%RH.
3. Do not store in or near corrosive gasses.
4. Use within 6 months of deliverly.
5. Do not store under direct sunlight.
6. Do not use the trimmer capacitor under the conditions listed below.

## ■ Notice (Soldering and mounting)

1. Soldering
(1) TZC3 series can be soldered by reflow soldering method and soldering iron. Do not use flow soldering method (dipping).
(2) Standard soldering condition
(a) Reflow soldering: Refer to the standard temperature profile.
(b) Soldering iron:
> Temperature of tip 260+-10 degree C
> Soldering time 3 sec . max.
> Diameter 1 mm max.
$>$ Wattage of iron 20W max.
Before using other soldering conditions than those listed above, please consult with Murata factory representative prior to using. If the soldering conditions are not suitable, e.g., excessive time and/or excessive temperature, the trimmer capacitor may deviate from the specified characteristics.
(3) The amount of solder is critical.
(4) The thickness of solder paste should be printed from 150 micro m to 200 micro m and the dimension of land pattern should be Murata's standard land pattern used at reflow soldering. Insufficient amounts of solder can lead to insufficient soldering strength on PCB. Excessive amounts of solder may cause bridging between the terminals or contact failure due to flux wicking up.
(5) When using soldering iron, the diameter of the string solder shall be less than 0.5 mm . The string solder shall be applied to the lower part of the terminal only. Do not apply flux except to the terminals. Excessive amounts of solder and/or applying solder to the upper part
(1) Corrosive gasses atmosphere (ex. Chlorine gas, Hydrogen sulfide gas, Ammonia gas, Sulfuric acid gas, Nitric oxide gas, etc.)
(2) In liquid (ex. water, oil, medical liquid, organic solvent, etc.)
(3) Dusty / dirty atmosphere
(4) Direct sunlight
(5) Static voltage nor electric/magnetic fields
(6) Direct sea breeze
(7) Other variations of the above
of the terminal may cause fixed metal rotor or contact failure due to flux invasion into the movable part and/or the contact point. The soldering iron should not come in contact with the stator of the trimmer capacitor. If such contact does occur, the trimmer capacitor may be damaged.
(6) Our recommended chlorine content of solder is as follows.
(a) Solder paste: 0.2wt\% max.
(b) String solder: $0.5 \mathrm{wt} \%$ max.
(7) Do not use water-soluble flux (for water cleaning). To prevent the deterioration of trimmer capacitor characteristics, apply flux only to terminals.
(8) When soldering the TZC3 series, the solder should not flow into the staking part of the substrate. If such flow does occur, driver slot rotation will be damaged.
2. Mounting
(1) Do not apply excessive force (preferable 5.0 N (Ref.; 500gf) max.), when the trimmer capacitor is mounted on the PCB.
(2) Do not warp and/or bend PCB to prevent trimmer capacitor from breakage.
(3) Use the suitable dimension of the pick-up nozzle ( 2.5 mm external diameter and 1.5 mm bore diameter).
3. Cleaning

Cannot be cleaned because of open construction.
4. Other

Note the polarity of the trimmer capacitor to minimize influence by stray capacitance.
(Refer to the dimensions concerning the polarity.)

## ■ Notice (Handling)

1. Use suitable screwdrivers that fit comfortably in driver slot.
(1) Recommended screwdriver for manual adjustment Standard type --> MURATA: KMDR010
Cross slot type --> TORAY: SA-1825
(Murata P/N is KMDR040)
(2) Recommended screwdriver bit for automatic adjustment
Standard type --> MURATA: KMBT010
Cross slot type --> TORAY: JB-1825
(Murata $\mathrm{P} / \mathrm{N}$ is KMBT040)
2. When adjusting with a screwdriver, do not apply excessive force (preferable 1.0N (Ref; 100gf) max.) to minimize capacitance drift. If excessive force is applied to the screwdriver slot, it may cause deformation of the products.
3. Do not apply adhesive, lock paints, or any other substances to the trimmer capacitor to secure the rotor position. They may cause corrosion or electrical contact problems.

## Ceramic Trimmer Capacitors

matrata

## TZW4 Series

## ■ Features

1. To meet high power application due to withstanding voltage 550Vdc.
2. Extremely high self resonant frequency. (More than 3 GHz at 1.5 pF setting)
3. Typical application: Impedance matching for Cellular Base Station.

4. High $Q$ value in more than VHF, UHF and Micro wave band. (More than 200 in $500 \mathrm{MHz}, \mathrm{C}$ max.)
5. Available for pick and place machine. Possible thinner design due to 2.5 mm low profile.

. Non electrical contact construction (rotor as middle electrode) provides high reliability.
6. Compact size due to $4.2(\mathrm{~W}) \times 5.2(\mathrm{~L}) \times 2.5 \mathrm{max}$.(H)mm.

## Applications

1. Transmitting power amplifier for Cellular Base Station
2. Transmitting amplifier for PHS Base Station
3. High frequency electric circuit
4. High power radio transmission
5. Transponder amplifier for cable TV

(4) Direct sunlight
(5) Static voltage nor electric/magnetic fields
(6) Direct sea breeze
(7) Other variations of the above
trimmer capacitor. If such contact does occur, the trimmer capacitor may be damaged.
(6) Our recommendable chlorine content of solder is as follows.
(a) Solder paste: $0.2 \mathrm{wt} \%$ max.
(b) String solder: $0.5 \mathrm{wt} \%$ max.
(7) Do not use water-soluble flux (for water cleaning). To prevent the deterioration of trimmer capacitor characteristics, apply flux only to terminals.

2. Mounting
(1) Do not apply excessive force (preferable 5.0 N (Ref.; 500gf) max.), when the trimmer capacitor is mounted on the PCB.
(2) Do not warp and/or bend PCB to prevent trimmer capacitor from breakage.
(3) Use the suitable PCB holes which are the same pitch as the terminal of the trimmer capacitor. If it would not fit with the terminal, the excessive stress would be applied to the terminal and the trimmer capacitor may deviate from the specified characteristics (Terminal shape C and D ).
(4) Do not apply bending stress more than 10.0 N (Ref.; 1kgf) after the trimmer capacitor has been mounted on the PCB (Terminal shape C and D).
(5) Mount trimmer capacitor in contact with PCB (Terminal shape C and D).
(6) In case of bending the terminals, do not apply excessive force to the body of the product and prevent the terminal fixing part from damaging.
(7) Use the suitable dimension of the pick-up nozzle.
> Without cover film type

- External dimensions of $4.5 \times 4.0 \mathrm{~mm}$ and 2.5 mm bore diameter.
> With cover film type
- 4.0mm external diameter and 2.0 mm bore diameter.

3. Cleaning [with cover film type]
(1) Isopropyl alcohol and Ethyl alcohol are available material for cleaning. Water group material like Pinealpha, Cleanthru can not be used. For other materials, please consult with
$\searrow$ Continued from the preceding page.
Murata factory representative prior to using.
(2) The total cleaning time by dipping, vapor and ultra-sonic method shall be less than 2 minutes.
For ultra-sonic cleaning, the available condition is as follows.
$>$ Cleaning time: 1 min. max.
> Power: 20W/liter max.
> Frequency: 20-60kHz
$>$ Temperature: Ambient temperature Due to the ultra-sonic cleaning equipment's peculiar self resonance point and the cleaning

## - Notice (Handling)

1. Use suitable screwdrivers that fit comfortably in driver slot.
(1) Recommended screwdriver for manual adjustment MURATA: KMDR010
(2) Recommended screwdriver bit for automatic adjustment MURATA: KMBT010
2. When adjusting with a screwdriver, do not apply excessive force (preferable 1.0N (Ref; 100gf) max.) to minimize capacitance drift. If excessive force is applied to the screwdriver slot, it may cause deformation of the products.

## - Notice (Other)

Before using trimmer capacitor, please test after assembly in your particular mass production system.
compatibility usually depends on the jig construction and/or the cleaning condition such as the depth of immersion, please check the cleaning equipment to determine the suitable conditions. If the trimmer capacitor is cleaned by other conditions, the trimmer capacitor may deviate from the specified characteristics.
4. Other

Note the polarity of the trimmer capacitor to minimize influence by stray capacitance. (Refer to the dimensions concerning the polarity.)
3. Do not apply adhesive, lock paints, or any other substances to the trimmer capacitor to secure the rotor position. They may cause corrosion or electrical contact problems.
4. Do not break the cover film before the completion of PCB mounting, soldering, and cleaning.
5. Do not clean the trimmer capacitor after the cover film has been broken.
6. To break the cover film, first turn the screwdriver more than 45 deg., the set the capacitance value. (Only inserting the screwdriver cannot break the cover film.)

## Ceramic Trimmer Capacitors

## Dimension of Tape

*1 : Tolerance varies with $\Delta \mathrm{S}$.
*2 : Except 1 mm from the stand-off position.

Ammo Pack

TZ03 Series
(in mm)

Please use the following recommended screwdriver.
You can order this driver with part number below.
Though you can also adjust the capacitance value by commercial products, please use one which has the same head size as the driver below.

- For Manual Adjusutment

* No ODCs (Ozone Depleting Chemicals) are used on Murata's all trimmer potentiometers
* TRIMCAP ${ }^{\circledR}$ is a registered trademark of Murata Mfg. Co., Ltd.

## （1）Note：

1．Export Control
〈For customers outside Japan〉
Murata products should not be used or sold for use in the development，production，stockpiling or utilization of any conventional weapons or mass－destructive weapons（nuclear weapons，chemical or biological weapons，or missiles），or any other weapons．
〈For customers in Japan〉
For products which are controlled items subject to the＂Foreign Exchange and Foreign Trade Law＂of Japan，the export license specified by the law is required for export．
2．Please contact our sales representatives or product engineers before using the products in this catalog for the applications listed below，which require especially high reliability for the prevention of defects which might directly damage to a third party＇s life，body or property，or when one of our products is intended for use in applications other than those specified in this catalog．
（1）Aircraft equipment
（2）Aerospace equipment
（3）Undersea equipment
（4）Power plant equipment
（5）Medical equipment
（6）Transportation equipment（vehicles，trains，ships，etc．）
（7）Traffic signal equipment
（8）Disaster prevention／crime prevention equipment
（9）Data－processing equipment
（10）Application of similar complexity and／or reliability requirements to the applications listed in the above
3．Product specifications in this catalog are as of April 2004．They are subject to change or our products in it may be discontinued without advance notice．Please check with our sales representatives or product engineers before ordering．If there are any questions，please contact our sales representatives or product engineers．
4．Please read rating and $\triangle$ CAUTION（for storage，operating，rating，soldering，mounting and handling）in this catalog to prevent smoking and／or burning，etc．
5．This catalog has only typical specifications because there is no space for detailed specifications．Therefore，please approve our product specifications or transact the approval sheet for product specifications before ordering．
6．Please note that unless otherwise specified，we shall assume no responsibility whatsoever for any conflict or dispute that may occur in connection with the effect of our and／or a third party＇s intellectual property rights and other related rights in consideration of your use of our products and／or information described or contained in our catalogs．In this connection，no representation shall be made to the effect that any third parties are authorized to use the rights mentioned above under licenses without our consent．

7．No ozone depleting substances（ODS）under the Montreal Protocol are used in our manufacturing process．
